February 24, 2025

Dear Valued Customer,

On Friday, February 21, 2025 Pulp & Paper Week, the publication that surveys the paper market, announced a \$40/per ton increase on 42# Linerboard and \$40/per ton increase on corrugated medium. Linerboard and medium make up the biggest portion of the paper components used to manufacture the corrugated packaging that you purchase from SupplyOne. In turn, SupplyOne must raise end user pricing, 5-8% to offset the increase in raw material costs, effective April 1, 2025. In turn, all pre-increase orders must be placed by March 14, 2025 to accommodate current lead times.

All customers with specific contractual arrangements, Managed Services Agreements (MSA) or Packaging Management Program (PMP) agreements relative to minimum notification and price protection periods will be honored. Please contact your salesperson regarding specific pricing, as it relates to your account.

Understanding the challenging nature of this inflationary environment and the oligopoly that is the paper market in North America, each salesperson is being tasked with working with their customers on alternative board grades, run quantities and products that may be equal in performance, but more cost effective.

We at SupplyOne value your business and look forward to working through these challenging times together as your packaging partner.

Sincerely,

Jamey Nolan  
President  
SupplyOne Florida
