Subject: Tariffs Increased on Imports from All Countries

Dear valued costumer,

As a result of President Donald Trump's announcement on (April 2, 2025), a 10% tariff on products originating from the Dominican Republic will come into effect on Saturday, **April 5th**. In this regard, and as a way to continue providing you with the best service, Plastifar has decided not to make changes to Incoterms and to include the cost of the tariff and expenses within your regular invoice, where you will be able to see this value as an additional item.

Find bellow what you need to know:

- **Reason:**
US Government 10% Tariff increase on all products made in the Dominican Republic.
- **Affected Products:**
Will affect all Plastifar and Bionature products.
- **What will be added to your new invoices:**
10% of the total amount merchandise value.
- **Incoterms:**
Plastifar will continue to provide the same services. We will deliver all Plastifar containers to your warehouse (DDP). since the duty will be covered by Plastifar while you pay the invoice to us, including the 10% fee calculated based on the FOB of the product.
- **Transparency and Communication:**
We are committed to keeping you informed about any changes that may affect your business
- **Shipments in transit:**
As this measure was implemented with a very short notice by the U.S. government, it is likely that if you have merchandise in transit invoiced prior to April 5 (not including duties and expenses) and whose entry into U.S. customs occurs after this date, Plastifar will have to cover the expenses and duties, in this case it will be sent as an additional invoice for this concept.

It is important to note that this new tariff is a measure that the United States government has placed not only for the Dominican Republic but for all imports of products entering American territory, being Dominican Republic one of the countries with the lowest tariff rate for entry into the United States.

Ivan Pimentel
International Sales Director
Plastifar S.A.
