

April 10, 2025

Dear Valued Customer,

Due to the impending tariff changes we are announcing an increase of 10% on all stock items. All custom products will have to be requoted as well. This increase will become effective May 12th 2025 on all purchase orders submitted on that date and after.

While it is difficult to truly know where these tariffs will eventually land, and what percentages will finally be decided, this notification is pending final assessment. Our goal is to mitigate increases as best we can and we're striving to control costs for all of our offerings.

We will be monitoring buying patterns and ask that our customers do not exceed 105% of normal orders.

As we move forward there will be many questions so please reach out to your appropriate representative for more information.

We thank you for your continued support in this tumultuous time. Our goal is the do everything we can to ensure consistent supply of quality products and offset these tariff increases as best as we can.

Thank you,

Mike Droz
