

May 14thth, 2026

Dear Valued Customer:

Effective June 8th, 2026, Gator Chemical will implement a 5% price increase on all products, for all new orders.

As you may also be experiencing across the industry, we have seen significant cost increases in several key areas, including:

- Labor – reduced availability and higher costs within the general labor market over the past six months
- Packaging – substantial increases in resin pricing over the last three months
- Raw Materials – rising petroleum-related costs impacting material pricing
- Transportation – increased freight and delivery expenses driven by fuel costs

While we have worked hard to minimize the impact of these rising costs, this adjustment is necessary to continue providing the quality products and service you expect from Gator Chemical.

We sincerely value our business relationship and appreciate your continued support. If you have any questions, please contact customer service at 800-224-9199, your local representative, or me directly.

Thank you for your continued partnership.

Sincerely,

Duncan Yull
President
