Sustainability and GP PRO

Our commitment to sustainability is an important aspect of stewardship at Georgia-Pacific, and we are proud to introduce the GP PRO sustainability platform. We believe it is our duty to responsibly manage the resources that we share with our community and the planet, while consistently seeking ways to provide more sustainable solutions to the customers, businesses and people who rely on our products.

The GP PRO sustainability framework reflects how we operate in an environmentally conscious manner while ensuring that our products and services meet the needs of our customers. Through these efforts, we aim to drive long-term value creation and keep our customers' success front and center while reducing our impact on the environment and maintaining compliance amidst rapidly changing environmental regulations.

The GP PRO Sustainability Framework

This framework represents our pillars of focus and the strategies we can apply to reduce environmental impacts while meeting customer and consumer needs. Our strategies fall under three focus areas: Source Responsibly, Responsible Manufacturing & Distribution, and Reduce Waste.

Pillars	Source Responsibly	Responsible Manufacturing & Distribution	Reduce Waste
Strategies	Promoting Healthy Forests	Reducing Energy & Emissions	Controlled Usage Dispensing Systems
	Using Recycled Content	Efficient Distribution	Design for Recyclability or Compostability
	Emerging Alternatives to Plastic	Packaging & Product Optimization	Educate to Increase Recovery

Use of the elements® logo signifies our commitment to sustainability. With our cohesive and comprehensive elements® platform, we aim to make sustainability understandable and solvable. How? By highlighting product claims, characteristics, and providing knowledge to enhance understanding of sustainability.
