April 27, 2026

To Our Valued Customers:

Resin suppliers have continued to escalate pricing on all grades of polyethylene raw materials citing the ongoing geopolitical situation in the Middle East disrupting global petrochemical feedstock supply chains, tightening the availability of feedstocks, and tightness of polyethylene resin supplies.

In response to the resin increases, effective with orders placed on or after **May 18th, 2026**, we will increase our selling prices by **12%** on all IBS Division products, including can liners, t-sacks, produce bags, and all food service packaging products. Orders placed prior to the effective date will be monitored closely to ensure that only the proportion of 30-day normal volume history will be accepted.

We appreciate your understanding of these extraordinary market conditions and thank you for your continued support of Inteplast. Please contact your local sales representatives for any question regarding this increase and the status of raw material price movement.

Sincerely yours,

David Su
Vice President
IBS Division Office
