NAPCO
Bag and Film

October 9, 2026

To Our Valued Customers,

Thank you for your continued support of NAPCO Bag and Film. It is our honor to serve you, and we appreciate being able to supply you with our line of Premium Can Liners and Poly Sheeting.

Resin suppliers have implemented an immediate price increase on all grades of polyethylene raw materials. They refer to surging US resin exports caused by ongoing high oil prices and an increase in domestic demand as the reason for the increase.

In addition to raw material increases, historically significant increases in fuel have dramatically added to the costs of transportation, packaging, and other manufacturing expenses.

As a result, NAPCO Bag and Film is increasing pricing on all can liners, sheeting and poly bags by **5%** with orders placed on and after **November 2, 2026**. We must insist that orders placed prior to this date remain at historical levels.

If you have any questions concerning this increase or market conditions, please feel free to contact your NAPCO Bag and Film sales representative. We understand that these increases, though necessary, may not be popular. Rest assured that we will make certain to keep you, our valued customers, as competitive and informed as possible.

Sincerely,

Dave Holloman
Vice President Sales and Marketing
