*I had a great experience with Air Titans. Blake was professional, respectful, and made me feel comfortable while home alone. The team communicated often, which I appreciated. I even signed up for their one-year membership—now my home feels healthier, and I've learned so much.*

Meg Conkling  
✓ Verified Buyer

★★★★★

*Wow! I thought I just needed vent cleaning—but my A/C was filthy. Dave cleaned the blower, sanitized it, and installed an air purifier. Marco handled the coils perfectly. Both were super friendly and helpful. The air feels so much cleaner now—huge peace of mind with kids at home.*

Gabriella  
✓ Verified Buyer

★★★★★

*I was nervous booking from a Facebook ad, but I'm so glad I did. Marco was genuine, honest, and thorough. He worked around my schedule and finished before my baby's nap. Unlike past lazy cleanings, this one was detailed and professional. I'll definitely be a repeat customer.*

Jade Campos  
✓ Verified Buyer

★★★★★

*Blake from Air Titans was professional, polite, and clearly knew his stuff. He explained everything honestly and with no pressure, just real options. As someone who knows AC systems, I appreciated his transparency. I'll definitely keep using Air Titans .*

Elvis  
✓ Verified Buyer

★★★★★

*Blake was fantastic—on time, communicative, and went above and beyond. He clearly explained what was wrong with my AC and made sure it was working before the heat kicks in. As someone who works outside, having cool air again means everything. Huge thanks, Blake!*

Heidi Mullaney  
✓ Verified Buyer

★★★★★

*Excellent service. Ryan inspected everything thoroughly and gave an honest opinion. Instead of replacing the unit like another company suggested, he cleaned the motor and handler, installed UV lights and an ionizer, and cleaned the vents. He saved me \$9K. Highly recommended!*

# The Mold Crisis In Florida: The Silent Epidemic Lurking in Your HVAC System

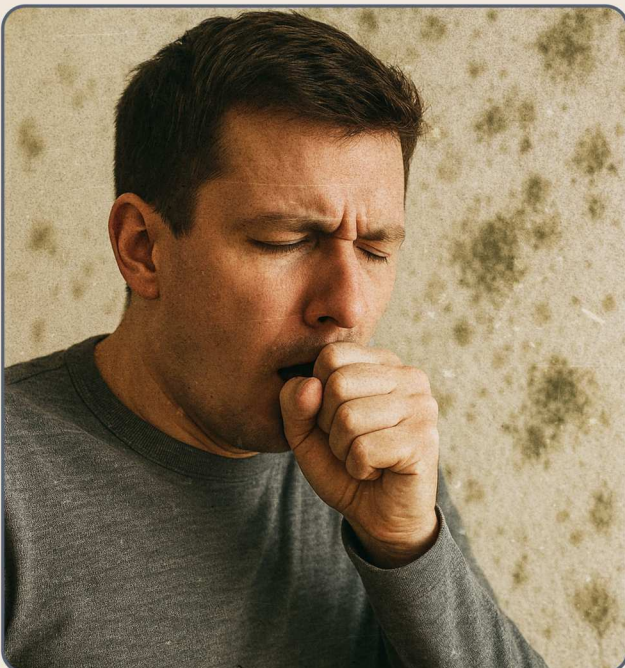

By Jacob Canfield (Aka Dr. Titan), Founder Of Air Titans

Florida isn't just known for its sunshine — it's ground zero for the most overlooked health crisis in America: mold in HVAC systems. And no one is talking about it.

At Air Titans, we didn't start this company because we dreamed of cleaning ductwork. We started it because I, a former wellness doctor, got sick... and no one could tell me why. The cause? Mold silently growing in my HVAC system, pumping toxins into every breath I took in my own home.

I'm not alone. FloridaHealth.gov has made it clear: *"Most, if not all HVAC systems in Florida will support mold growth at some point."* And the EPA warns: *"Do not run your HVAC system if you suspect it contains mold — it can spread contaminants throughout your home."*

Let this sink in: Mold in your HVAC system isn't just possible — it's a guarantee. And once it starts, every time you run your AC, you could be circulating airborne mold spores, bacteria, and other toxins throughout your home. If not addressed, it's only a matter of time before those contaminants end up in the air you and your loved ones breathe every single day.

## So How Does It Start?

Let's break it down. Mold doesn't just show up out of nowhere — it needs three things to grow:

1. Organic material (like dust or dirt)
2. Moisture
3. Darkness and stagnant air

And unfortunately... your HVAC system checks all three boxes.

### It starts at the coil

Your evaporator coil is the heart of your AC system — and it's wet 24/7 in Florida's year-round humidity. That constant moisture, combined with the dark, enclosed space, makes it a prime location for mold to thrive. (refer to diagram on next page)

### Dust and debris get pulled in

Dirty ductwork and clogged air filters send dust and particles into your system — and that dust acts as food for mold. It collects on your coil and gives spores a perfect surface to grow on.

### Your lungs become the filter

Those invisible particles don't just disappear. You breathe them in — day after day, night after night. That's when the symptoms start: Allergies, Fatigue, Chronic congestion, Brain fog, Even asthma flare-ups in children. This isn't rare — this is happening in millions of Florida homes right now.

### Spores begin to spread

Once mold takes hold, every time your AC turns on, it sends microscopic spores — along with bacteria and allergens — flying through your ductwork and into every room of your house.

# What Can You Do About It?

## Schedule Regular Maintenance

Get your AC cleaned, tuned-up and inspected twice a year. Make sure it's not just running, but running clean.

## Use Safe Botanical Sanitizers

At Air Titans, we use hospital-grade botanical fogging agents like Benefect — proven to help kill mold and bacteria without harsh chemicals — and we apply them directly through your air system to sanitize every inch.

## Clean Your HVAC Air Ducts Every 1–2 Years

This isn't a luxury — it's a health necessity. If you haven't cleaned your air ducts or coils, you're likely breathing in years of microbial buildup.

## Install UV Light (aka Sunlight for Your System)

Just like the sun kills bacteria outside, UVC light inside your air handler prevents mold from ever taking hold on your coils again. This is one of the most powerful preventative measures you can take.

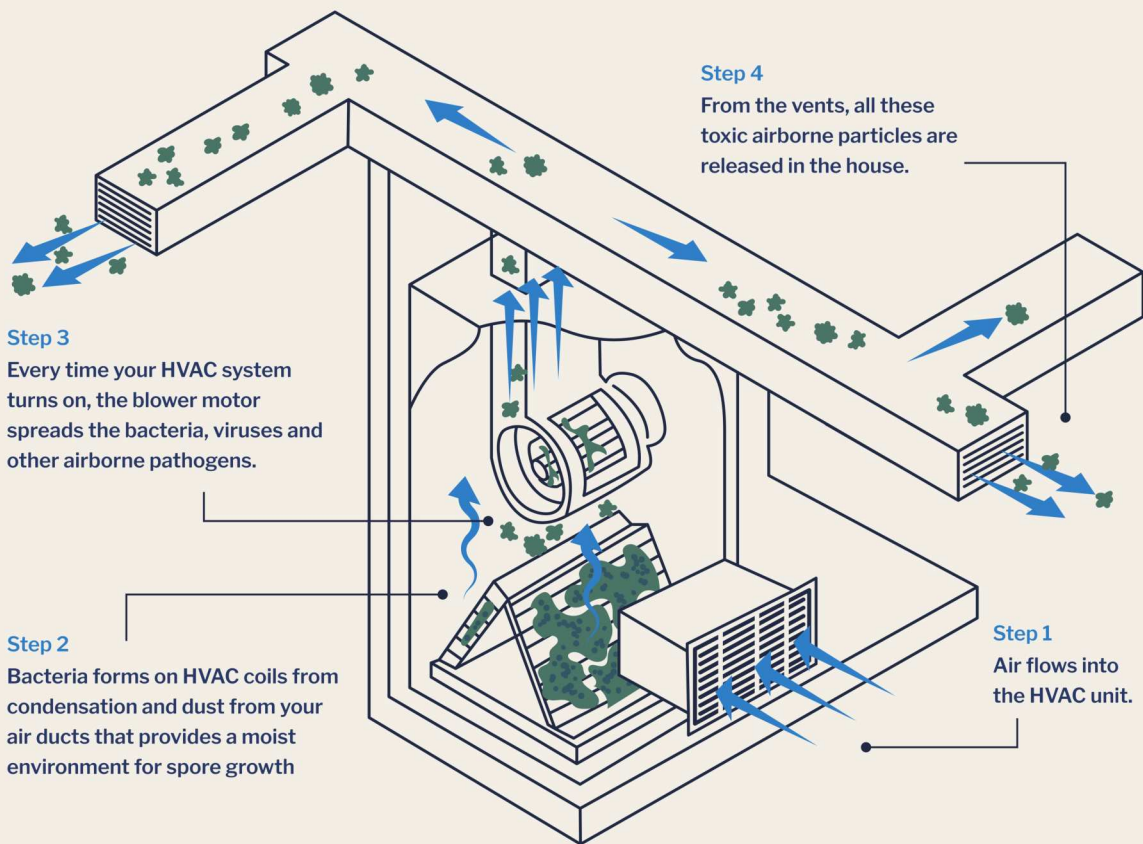

# We Built Air Titans Because Nobody Else Would

When I got sick, no HVAC company had a clue how to handle it. That's why we built Air Titans- a doctor-founded, veteran-owned company that puts your health first, not just your comfort.

We're here to lead the fight against Florida's indoor air quality crisis. And we're not stopping until every home breathes clean.

# HOW MOLD GROWS IN YOUR AIR DUCTS

# What To Expect On The Day Of Your Appointment

## Pre-Appointment Communications

### Confirmation of Your Appointment

Once your booking is confirmed, you'll receive an email confirmation detailing the date, time, and scope of your air duct cleaning service. This confirmation serves as your first assurance that your appointment is successfully scheduled in our system.

### 24-Hour Reminder

We understand life gets busy, so we'll send you a reminder 24 hours before your scheduled appointment. This reminder will include the appointment details again, ensuring you have ample time to prepare or reschedule if necessary.

### Technician Dispatch Notification

On the day of your appointment, we will send you a notification when your technician is on their way. This notification will provide the technician's estimated time of arrival, so you know exactly when to expect us. Our goal is to keep you informed every step of the way, minimizing any disruption to your day.

# What To Expect On The Day Of Your Appointment

## Our 5-Step Doctor Created Air Duct Cleaning Process

Created by a wellness doctor. Trusted by 20,000+ Florida homeowners

### Step 1

#### Home Walkthrough & Air Quality Consultation

Your certified Titan Technician will introduce themselves and do a walkthrough of your home. They'll identify all vents, locate the HVAC system, and ask about pets, allergies, and any indoor air concerns you've noticed.

If we notice anything unusual during your inspection, we'll show you and explain what it means — no pressure, no surprises. Just honest guidance so you can decide what's best for your home and your budget.

### Step 2

#### Full HVAC System Inspection

We check the core areas of your HVAC system:

- Return & supply plenums
- Ductwork
- Blower motor
- Coils
- Air handler components

This ensures your system is safe, operating properly, and ready for cleaning. If any issues are found, we'll show you before proceeding.

### Step 3

#### Create A Hurricane-Force Vacuum

We connect our HEPA 5000+ CFM negative air machine — powerful enough to create Category 1 hurricane-force suction through your ductwork.

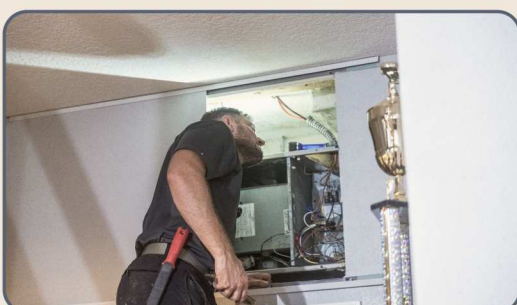

This system pulls out dust, debris, and allergens while trapping them inside a medical-grade HEPA filter — the same standard trusted in hospitals — so nothing gets recirculated back into your home.

Safe for all duct types – no brushes, no damage, just powerful, clean results.

### Step 4

#### Clean Return & Supply Ducts + Plenums (Without Damaging Your System)

We clean your full duct system — both return and supply vents, plus the plenum boxes — using high-suction hoses and soft-tip air whips. Our tools are specifically designed for HVAC cleaning and are safe for all types of ductwork, including flex ducts. No bristles. No damage. Just better airflow, less dust, and a cleaner, healthier home.

### Step 5

#### Post-Job Review & Report

We wrap up with a full quality check and walkthrough. Your technician will review before-and-after photos with you and offer maintenance tips or recommendations (if needed) to keep your system healthy.

# Meet The Heart Of Air Titans: Our Certified Technicians

Florida's #1 Prevention-Focused HVAC Team

At Air Titans, we believe that great HVAC starts with great people. Our certified technicians aren't just highly trained — they're trusted experts who lead with education, integrity, and a commitment to prevention.

## Every Air Titans Tech Is:

- ✓ Licensed & Background-Checked
- ✓ Trained in Doctor-Designed Indoor Air Quality Protocols
- ✓ Held to the Highest Standards in Safety, Cleanliness & Care

We don't wait for breakdowns. Our techs are trained to spot small issues before they become expensive problems — and to protect your family's health by ensuring clean, safe air flows through your home year-round.

## Air Titans Technicians: Built Different. Trained Better.

- ✓ **We're Prevention-First**  
Our techs don't just fix HVAC problems — they help stop them before they start.
- ✓ **Friendly & Respectful**  
You'll never deal with pushy sales tactics or lazy shortcuts.
- ✓ **IAQ-Focused**  
Every tech is trained to improve indoor air quality in your home, not just comfort.
- ✓ **Professionals You Can Count On**  
On time, prepared, and proud of their work — always.

## Your Air. Your Health. Your Titans.

Our people are what make us different. When you book with Air Titans, you're getting more than a technician — you're getting a true HVAC partner who's here to help your family breathe easier and live healthier every day.

# Air Titans Services

With our expert services and innovative solutions, we're dedicated to improving the quality of life within your living spaces.

## 01 HVAC Repair

If your heating or cooling system isn't working properly, Air Titans provides fast and reliable same day services to restore comfort to your home. Our skilled technicians quickly diagnose and fix issues, ensuring your system runs efficiently. From uneven temperatures to unexpected breakdowns, we'll get your HVAC back in top shape with expert solutions.

## 02 HVAC Installation

Upgrade to a high-performance HVAC system with Air Titans. Our HVAC installation service ensures your home stays comfortable year-round while maximizing energy efficiency. We help you choose the right system for your space, providing seamless installation with top-quality equipment. Enjoy better air circulation, lower utility bills, and long-term performance with a professionally installed system.

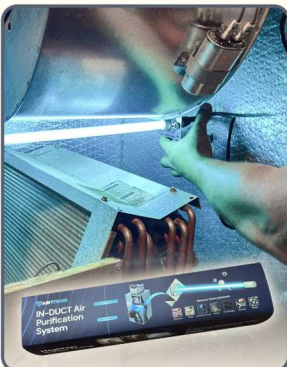

## 03 Air Duct Cleaning

Breathe fresher air with professional air duct cleaning from Air Titans. Over time, dust, allergens, and debris build up in your ductwork, affecting air quality and HVAC efficiency. Our deep-cleaning process removes contaminants, improving airflow and reducing allergens in your home. Cleaner ducts mean better air circulation and a more efficient system.

## 04 Ductwork Repair & Replacement

Damaged or inefficient ductwork can cause energy loss and uneven airflow. Air Titans specializes in ductwork repair and replacement, ensuring that your HVAC system distributes air properly throughout your home. Whether sealing leaks, repairing damaged ducts, or replacing outdated sections, we help improve efficiency and indoor comfort.

## 05 UV Light Installation

Improve your indoor air quality with UV light installation from Air Titans. UV technology neutralizes airborne particles and helps keep your HVAC system cleaner. This extra layer of protection reduces unwanted odors and enhances overall air freshness, making it an excellent addition to your home's air quality strategy.

## 06 Whole Home Air Purifiers

Ensure your home's air stays clean and fresh with a whole home air purifier from Air Titans. These advanced systems work with your HVAC to remove dust, allergens, and airborne pollutants. Our expertly installed purification solutions help create a healthier indoor environment, improving comfort for you and your family.

## 07 Indoor Air Quality Inspection

Ensure the air in your home is fresh and clean with an indoor air quality inspection by Air Titans. Our experts assess ventilation, airborne particles, and overall air circulation to identify potential concerns. We provide customized recommendations to help you enhance air quality, making your home a healthier space for you and your loved ones.

# The Air Titans Story

**A Doctor's Wake-Up Call: "The Air I Breathed Was Killing My Health"**

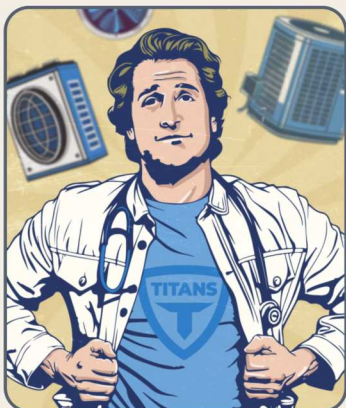

## My Florida Wake-Up Call

After years of helping patients as a wellness doctor in Michigan, I moved to Florida for a fresh start and some sunshine. But within weeks, I felt off. My energy tanked. I had dry eyes, chronic congestion, and headaches that wouldn't go away. I spent thousands on medical tests—bloodwork, allergy panels, scans—but everything came back normal. Nobody had answers.

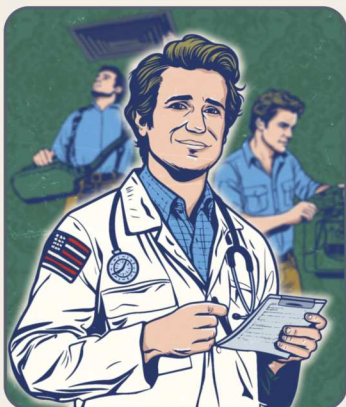

## The Real Cause Was Right Above Me

Out of frustration, I started inspecting everything in my home. When I opened the HVAC system, I was shocked. My coils were soaked and slimy, covered in black buildup. The air ducts were lined with dust and bacteria. My system—like so many in Florida—was creating the perfect environment for mold to grow. So I replaced my system, added a UV light, and sanitized the ductwork. Within days, my symptoms vanished. That's when it hit me: this is happening in homes all over Florida, and nobody's talking about it.

## Founding Air Titans: A Prevention-First HVAC Company

I realized most HVAC companies focus only on comfort—getting your system working again. But what about your health? I started Air Titans to close that gap. We're the only veteran- and doctor-owned HVAC company in Florida that puts indoor air quality and prevention at the center of everything we do. From UV systems to advanced sanitation and filtration, we don't just fix your AC—we protect your family's health.

## Your Prescription for Clean, Safe Air

Just like a doctor prescribes a treatment plan, our team prescribes clean air. Our proprietary processes use HEPA-grade equipment and doctor-designed protocols to eliminate airborne threats before they make you sick. At Air Titans, we're not just technicians—we're guardians of the air you breathe.
