

FOR SCHOOLS & EDUCATORS

Real-World Challenges. Real Student Growth. Zero Disruption.

DoCurious partners with schools to bring standards-aligned, hands-on Challenges to students, replacing excessive screen time with real-world accomplishments they can be proud of and helping to boost academic performance.

DoCurious is a Challenge Marketplace built on the principles of positive psychology. DOers (our word for participants) take on goal-oriented, real-world Challenges that build confidence, connection, and capability. For schools, Challenges are mapped to core standards, so what students do off their screens counts toward what they're already working to achieve, no new curriculum required.

Why Schools Partner With Us

Standards-Aligned

Challenges connect to core standards, so completed work supports academic credit.

A Real Competitive Edge

Position your school among those moving deliberately away from excessive screen time and EdTech.

Built to Launch Quickly

Curated starter packages by grade include an implementation guide, ready to go.

Stronger Community Ties

Turn student accomplishments into stories that strengthen ties with parents and PTOs.

Challenges Are Designed to Build:

Confidence

Leadership

Communication

Creativity

Problem-Solving

Career Awareness

Perseverance

Engagement

How a Pilot Works

1

Pilot

A small group of classes tries curated Challenges for one semester. No setup fee, no monthly cost.

2

Tailor

We refine Challenge choices together, using real feedback from teachers, students, and administrators.

3

Roll Out

Expand grade by grade or school-wide, with simple, transparent pricing.

What's Included in Every Pilot

- ✓ Teacher onboarding
- ✓ Curated Challenge packages
- ✓ Customer Success support
- ✓ Progress check-ins
- ✓ End-of-pilot review

DoCurious is in early launch, building our evidence base with partner schools like yours.

Curious what a pilot could look like at your school?

Let's find 15 minutes to talk it through.
