Prof. Massimiliano Greco is an Assistant Professor at Humanitas University, specialized in anesthesiology and intensive care. He is a member of the faculty council for the PhD program in Data Science in Medicine. He teaches in the Master's Degree program in Data Analytics and Artificial Intelligence in Health Science, a joint initiative with Bocconi University, and in the MEDTEC joint degree program with Politecnico di Milano.

He has been elected as the chair of the Data Science Section of the European Society of Intensive Care Medicine and also represents the Lombardy region as the regional representative for anesthesia and intensive care in national society.

In the clinical setting, he is a senior consultant in intensive care at IRCCS Humanitas Research Hospital.After earning his MSc at LSHTM, Prof. Greco has focused his research on epidemiological analysis in anesthesia and intensive care. He specializes in the application of data science and machine learning to critical care and anesthesia, with a strong emphasis on high resolution data, wearable devices and prediction algorithms
