Verify Pricing

Subscription Bundles

Your bundle is your wallet of credits

Each check deducts credits, so you only use what you need.
The bigger the bundle, the lower your price per credit.

Foundation — Base rate

From
3,400
credits a year

£5,100 a year
£1.50 per credit

Core — Save 6.7%

Recommended Tailoring

The following additional tailored configurations are recommended to further enhance your customer experience, brand recognition & client adoption rates:

Application and Forms Analysis

Initial Analysis
£1,250
Annual Maintenance
£500/year

One day of consultancy to analyse client application forms and map them to Verify's check services, configurable forms, and additional document requirements. Typically covers analysis of 5 standard forms, but additional charges may apply for unusually long or complex forms. Ensures the onboarding process aligns with client's existing procedures while capturing all required information.

Initial Analysis: 1 day of consultancy, typically covers 5 standard application forms – additional charges for complex or unusually long forms. Annual Maintenance includes review session for amendments and updates to application forms as requirements change.

Deliverables

- Mapping of existing forms to Verify services
- Configuration recommendations for optimal alignment
- Documentation of capture requirements
- Annual review and update session

Custom Email Template Creation

Implementation Fee
£1,500
One-time fee for custom HTML template creation and deployment

Custom HTML email template creation and branding for clients wanting branded email communications from Verify. Templates are created and deployed by Tiller, with emails sent through Verify's standard email infrastructure.

Service includes

- Custom HTML email template design with client branding
- Logo integration and colour scheme matching
- Template deployment within Verify system
- Basic template testing and validation

Deliverables

- Fully branded HTML email templates deployed in Verify
- Template preview and approval process
- Basic documentation and template overview

Email Server Integration

Implementation Fee
£2,000
Annual Maintenance
£500/year

Email infrastructure integration for clients requiring SMTP routing through their own domain and email server. Provides complete email infrastructure customisation and ongoing technical support.

Service includes

- Custom email domain configuration and DNS setup
- SMTP integration through client's email servers
- Email routing and delivery configuration
- Documentation and technical handover training

Deliverables

- Configured email infrastructure with client domain integration
- Technical documentation and setup guides
- Integration testing and validation
- Ongoing configuration support during setup

Annual Maintenance includes

- Email infrastructure updates and modifications
- Configuration changes and technical adjustments
- SMTP routing support and troubleshooting
- Domain management and DNS configuration support
