

ZERO EMISSION CARGO HANDLING EQUIPMENT AND
INFRASTRUCTURE AT BERTH 63
OAKLAND, CALIFORNIA

SSA Terminals, LLC (SSA) is releasing this Request for Proposals for Zero Emission Cargo Handling Equipment and Infrastructure at Berth 63. SSA will be accepting bids until Friday, August 28, 2026.

The work of this 549 calendar day (18 month) project consists, in general, of furnishing all labor, materials, appliances, tools, equipment, transportation, services, and supervision required for the installation of electric vehicle (EV) charging infrastructure. The work includes, but is not necessarily limited to, the installation of thirty (30) heavy-duty EV chargers, associated electrical equipment, underground conduits, vaults, cabling, switchgear, and transformers. Additional work includes site preparation, grading, pavement restoration, security fencing, lighting, and any necessary testing and commissioning to ensure the successful operation of the EV charging infrastructure.

The Engineer's estimate for this project is \$19,000,000.

Full details of the bid and related drawings and documents can be found at [ZE Infrastructure at Berth 63 | Powered by Box](#).
