

NEPTUNUS[®] eMotion

Product Information

Pulse-Lavage-System

Just in time for our tenth product anniversary in 2020, we are presenting the new Neptune eMotion generation. You are an orthopaedic surgeon or trauma surgeon and you want to work with the latest cementing technology? Is the effectiveness of your Pulse Lavage very important to you and do you value a high rinsing performance with effective suction? Then you will like the new Neptune eMotion system. This means that you care about the modern technology and the environment. Take a valuable step towards the future with us. The functionality of the system and the Roman mythology inspired us to name our system after Neptune - the God of Flowing Waters.

UPDATE

-  **10% lighter**
-  **Powerful**
-  **Intuitive operation**
-  **Patented electrical engineering**
-  **Environmentally friendly**
-  **UDI-tagging**

Flushing sets

Using of materials of the highest quality

All flexible materials are
PVC / phthalates / latex free
Tested and excellent with the
"Phthalate Free" seal

The test of our sets at the Fresenius
institute confirms that to you

Neptunus eMotion is our message and vision for a sustainable and environmentally friendly future! The patented electrotechnology allows you to choose between two power levels which enables you to work more efficiently. The high cleaning pressure combined with the low- noise is our unique sign of quality. The one-piece aluminium casing combines ergonomics and robustness. Thanks to the use of phthalate free rinsing kits, you create a high level of safety for your patients. The pulse- lavage system is an important basis for sustainable cementing success. We are convinced: The best place for the Neptune eMotion Pulse Lavage is your operating theatre!

What Experts say about the Neptune eMotion Pulse Lavage:

"For several years we have been using the Neptune Pulse Lavage System for knee endoprosthesis implants. Why has this system worked for us? First of all, the effectiveness of this jet lavage is very high compared to its competitors and you can intuitively choose between two intensity levels depending on the bone structure. On the other hand, the fixed but also removable front can be used universally for hard-to-reach joint parts. The shape and material consistency of the attachment piece enable rinsing with a high- quality effective suction. It is not necessary to change the suction hose at the suction unit in the operating room. From the environmental aspect, the Lavage System convinces with its multiple usage and PVC and phthalate-free materials. The new generation of the Neptune eMotion is even easier to handle, quieter and more effective than the generation before. Therefore we can only recommend this system!"

Priv.-Doz. Dr. med. Jens Anders | Chief Physician and Medical Director | Clinic for Orthopedics, Clinics Dr. Erler in Nuremberg (before: use of conventional disposable systems)

The Neptune eMotion Pulse-Lavage-System in detail

strong properties

- Two power levels: high / low
- Powerful flushing pressure through electrical technology for cleaning
- Adaptable and detachable splash guard with stop function
- Optimal size of the suction for safe drainage of loose bones and tissue particles
- Quiet operation
- Environmentally friendly thanks to a combination of proven technology, reusable handpiece and disposable sets.
- Made in Germany
