

ChatGPT Demystified From Magic to Practical Skills in 4 Hours

Instructor: En. Mohamed Assari

LPD Course

-  Saturday, 4th October 2025
-  9.00 a.m. – 1.00 p.m.
-  RM25 - Refreshments available
-  Mode: Physical

About This Programme

Generative AI often evokes a sense of modern magic due to its powerful and transformative nature, already reshaping the world. However, underlying this magic are foundational concepts, practical tools and learnable skills. This 4-hour workshop aims to demystify Generative AI. It guides participants from an initial sense of wonder to a place of understanding and confidence. The workshop cuts through hype and complex jargon, revealing what Generative AI truly is, how it functions, and most importantly, how it can be used as a practical tool.

Target Participants

Adults with limited exposure to Generative AI and wish to learn more about Generative AI.

Duration

4 hours

Methodology

This workshop combines a mix of learning methods, including short inputs, group exercises and feedback, questionnaires and discussions using both case studies and real-life situations. Participants will have access to computers for hands-on experience in using GenAI tools.

Learning Outcomes

At the end of this course participants will be able to:

- Define the key terms Artificial Intelligence (AI), Generative AI and Large Language Models (LLMs).
- Explain the relationship between these concepts and how Generative AI represents a significant advancement.
- Describe the basic functions of LLMs.
- Identify and explain the importance of core concepts like "context window", "prompt engineering" and the causes of "AI hallucinations".
- List several real-world applications of Generative AI across different fields.
- Use GenAI tools to perform practical tasks, such as summarising long documents, brainstorming ideas and drafting communications.
