01 WHAT YOU CAN ASK

Seven things, one prompt away.

01

Live Fixtures & Odds

Ask for real-time fixtures and odds across every supported sport and league. Get instant snapshots of today's action without leaving the conversation.

02

Player Props

Request player prop markets for any upcoming game directly through Claude. Every player, every market, on demand.

03

Line Movement History

Ask Claude to show how a line has moved over time. Spot trends, identify sharp action and understand where the market is heading.

04

Cross-Book Line Comparison

Compare lines across multiple sportsbooks side by side and instantly surface the best available price for any market.

05

Outlier Detection

Scan every active market and flag odds that stand out from the pack. Catch mispriced lines before the market corrects.

06

Futures Odds Comparison

Pull and compare futures prices across books for any season-long or tournament market, all in one response.

07 **Bet Grading** Check the result of any settled market in seconds. No spreadsheets, no manual lookups.

02 BUILT FOR THE WAY TRADING DESKS ALREADY WORK

No SDKs. No glue code. No new dashboard to learn.

Connect your OpticOdds API key to Claude Desktop and the full feed becomes queryable in plain English, the same data your engineering team already trusts, in a new interface.

- Trading teams pricing in real time
- Risk managers hunting outliers
- Product leads stress-testing markets
- Developers prototyping without glue code
