

Give your AI a live read on the market.

OpticOdds MCP connects an AI assistant directly to real-time sports betting data and purpose-built tools. Teams can build natural-language sports workflows with less custom integration work.

CONNECTION OPTIONS

WHY OPTICODDS MCP

A faster path from sports question to product value.

Ask the market

Query fixtures, odds, props, injuries, results and more in plain language.

Build with less glue

Use purpose-built tools instead of hand-coding each supported REST workflow.

Move to action

Compare lines, find best prices and outliers, inspect history, and grade bets.

WHAT TEAMS CAN BUILD

MARKET MAKING + ODDS COMPARISON

Compare books and surface the best available price.

TRADING + RESEARCH ASSISTANT

Track line movement, outliers, props and injuries.

CONSUMER SPORTS EXPERIENCE

Answer live fixture, odds and player-prop questions.

OPERATIONS WORKFLOW

Retrieve results and grade settled bets or futures.

HOW IT WORKS

01

Authenticate

Use your OpticOdds API key.

02

Connect

Hosted HTTP or local npx.

03

Ask

The assistant calls the right tool.

04

Use

Live data returns to the workflow.

Put real-time sports intelligence inside your AI experience.

Explore the MCP integration, then talk with the OpticOdds team about your use case.
