

Crypto Assets Made Simple for Broker-Dealers

Prometheus Capital enables broker-dealers to enter crypto asset markets, today.

Through Prometheus Capital's correspondent clearing services, traditional broker-dealers can offer crypto assets to their clients via an SEC-registered broker-dealer.

- Enhance client retention and acquisition
- Win back flow lost to crypto and fintech trading platforms
- Future-proof your business for the digital market transformation
- Build a long-term on-chain securities strategy

Through your existing account structure, Prometheus Capital enables broker-dealers to build a crypto asset business through:

Crypto asset custody

Qualified custody of crypto assets, including digital securities, in accordance with 15c3-3 customer protection and possession/control requirements.

Correspondent clearing

Allow your customers to buy/sell crypto assets through their existing brokerage account with turnkey settlement and clearing infrastructure.

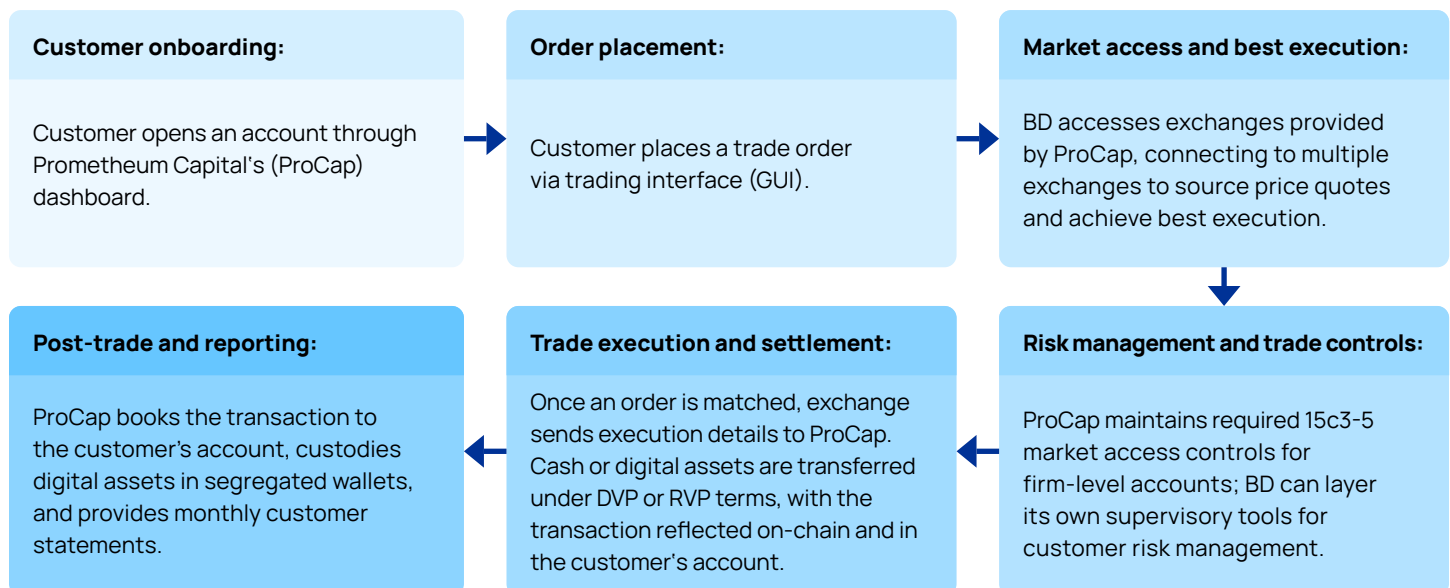

Infrastructure-as-a-service

Integration guidance, compliance frameworks, and operational processes to enable seamless adoption of crypto asset custody and trading.

Prometheus Capital provides you everything you need to quickly enter digital markets through your existing regulatory and compliance infrastructure. Our white glove service manages all onboarding, integration, education, and infrastructure needs so you can offer crypto assets immediately.

Here's how it works:

Grow your business with Prometheus Capital.

Prometheus Capital provides FINRA member and SEC-registered access to crypto asset markets through infrastructure purpose-built for broker-dealers. Starting with ETH custody, Prometheus Capital bridges today's traditional securities markets with tomorrow's fully digital, on-chain securities markets.
