

NEXT- GENERATION COMMAND CENTER

WE OVERHAULED THE COMMAND CENTER and it is now entirely accessible through the LVT App. It now offers a smoother, more streamlined experience for managing alerts and allows for a scalable, customizable solution that boosts situational awareness, simplifies operational setup, and ensures timely incident management.

ABOUT MANAGING
YOUR LVT UNITS.

KEY FEATURES

Instant video playback

- Access and stream recorded videos with no delay, improving decision-making processes and enabling more accurate and effective responses.

View and manage multiple camera views

- Watch cameras from multiple units for a more comprehensive and detailed understanding of incidents.

Intelligent prioritization

- Configure the Command Center to prioritize alerts and decide what notifications they receive, like marking potential assaults as high priority and animals as low priority.

In-depth analytics

- Classify incidents and quickly review incidents within a category to understand how those situations were resolved.

Incident history

- A timeline view shows exactly what happened during an incident across LVT Units, including security personnel actions. These insights make it easy to review responses and find training opportunities to optimize future responses.
