

MOUNTING OPTIONS

LVT

INCREASED FLEXIBILITY, CUSTOMIZATION, AND MOBILITY

BEYOND THE MOBILE SURVEILLANCE UNIT

LVT offers different mounting structures to satisfy the unique requirements of your site. The full LVT Unit meets most needs, with a footprint of about 8 feet wide and 8 feet deep and over 22 feet high. It uses a combination of solar power and cellular connectivity to make your security truly mobile.

However, if a more covert option is needed, the Live Unit can be mounted to an existing wall or pole with access to 220V (AC).
