

ENHANCING COMMUNITY SAFETY IN PUBLIC SPACES WITH LVT

As homelessness reaches crisis levels, cities of all sizes need effective tools to manage public spaces and protect infrastructure. LVT helps community leaders improve safety for all citizens and secure vital public and private assets.

How LVT Supports Your City's Efforts:

» **ACTIVE, AI-POWERED DETERRENCE**

LVT® Units are designed to be noticed. The systems combine a highly visible deterrent presence with cameras, lights, alerts, and AI-powered analytics to defend against unauthorized activity. Detection is fully customizable to ensure staff receive only actionable, necessary alerts, reducing noise pollution and response fatigue.

» **IMMEDIATE DE-ESCALATION**

Direct communication is a vital tool for deterrence and de-escalation. LVT® Units have a speaker that supports customized AI-driven audio messaging, pre-recorded announcements, and talk down capability, allowing city staff to communicate with individuals on-site instantly and remotely.

» **SIMPLIFIED EVIDENCE AND DOCUMENTATION**

When prohibited or illegal activity occurs, clear documentation is vital for investigations. The LVT® Platform captures high-resolution, time-stamped footage and simplifies evidence sharing to expedite incident reporting and support law enforcement efforts.

» **FLEXIBLE AND RAPID DEPLOYMENT**

LVT® Units are mobile, solar-powered, and designed for swift installation without infrastructure requirements. This flexibility allows cities to quickly reposition assets based on real-time data, changing seasonal needs, or evolving public space management priorities, maximizing investment return.

"I can place a trailer in a high-crime area and monitor it without tying up police officers. It's a fraction of the cost and just as effective."

—ARCADIA POLICE DEPARTMENT

↓ 50% reduction in unwelcomed behaviors

↓ 15% decrease in property crime
