

Unlock the Power of

LVT AS A PROGRAM

Every organization and site has unique safety and security challenges. That's why when you partner with LVT, we help you classify your sites to address those challenges, mapping them to the correct solution for achieving 24/7 security at a fraction of the cost of guards.

UNLOCK FULL-SITE VISIBILITY *

Eliminate blind spots, gain broader visibility, and make better use of your space. Customized mapping takes into account all possible placements and configurations of our MSU and wall- and pole-mounted options to maximize effectiveness.

FIGHT DESENSITIZATION WITHOUT HUMAN INVOLVEMENT

Instill fear in bad actors with advanced deterrents, including our breakthrough AI talk down, which delivers personalized messages, and the PT spotlight, which automatically snaps to and shines a light on the center of the detecting camera's field of view.

GAIN REAL-TIME SITUATIONAL AWARENESS *

Achieve newfound situational awareness at sites where traditional camera systems can't be supported. Augment guards with 24/7 alerts on unusual activities, and ensure a streamlined response with integrations for Fusus and Immix.

STREAMLINE INVESTIGATIONS AND SAVE TIME

Skip manually sifting through hours of footage with forensic search, which lets you quickly locate relevant alert clips with natural language queries. Enhance your security strategies with program reporting that tracks security events over time.

DETECT SUSPICIOUS ACTIVITY AND DETER CRIME *

Stop crime before it happens. Detect unusual behaviors, including loitering and intrusions, and configure appropriate deterrents, from strobes to pre-recorded audio messages, based on what's detected.

MANAGE YOUR PROGRAM AT SCALE *

Ensure program-wide control with the LVT Platform's role-based user permissions, audit logs, and bulk unit management capabilities. Enjoy increased storage for improved data retention and efficient video review, including instant video playback.

**Recommended for most sites*

DIFFERENT KINDS OF SITES, DIFFERENT KINDS OF CHALLENGES.

Proactive security demands a programmatic approach. We work with you to assess your site's unique challenges, ensuring your LVT program is tailored to your locations' differing needs.

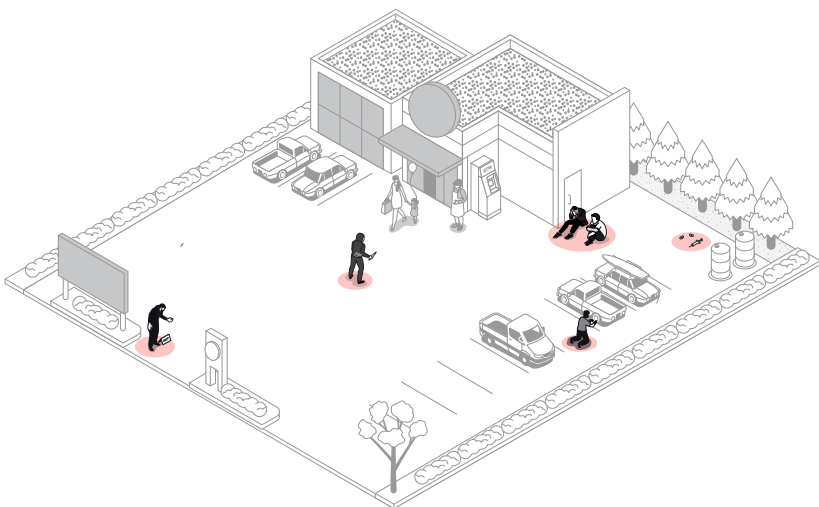

EXAMPLES:

SITE 1:

WAREHOUSE AND FULFILLMENT CENTER

Your warehouse and fulfillment center sees frequent crime, from cargo theft to illegal dumping, and scores the highest ranking on our threat assessment. It is big and busy, requiring a standard LVT Unit and a wall-mounted Unit to provide full coverage. Given this site needs extra attention without straining your resources, it receives the advanced deterrence package.

Proposed Solutions:

SITE 2:

RETAIL STORE

Your store sits in a small city with moderate crime. The store typically faces issues with loitering, especially in the back corners of the lot, and theft. This site scores lower on our threat assessment scale and requires an extended wall mount configuration to see around the corners of the building.

Proposed Solutions:

MEET INDIVIDUAL NEEDS WITH CUSTOM ADD-ONS

Consider additional services that could fit your organization's needs beyond the options we've already covered. Add-ons like third-party alert response services and satellite connectivity for remote areas where cellular coverage is not feasible can further enhance effectiveness and ROI.
