

Security needs can change the moment an employee, subcontractor, or vendor steps into a dark parking lot or remote job site. SafeNow extends the power of your LVT Units, putting active deterrence directly into the hands of your workforce.

KEY BENEFITS

INSTANT, PROACTIVE DETERRENCE

A single swipe instantly triggers floodlights, strobes, and audio warnings to clear a path and deter threats in real time.

TWO-STAGE RESPONSE

Prioritize on-site deterrence to stop threats before they approach, while maintaining a direct bridge to 911 for emergency situations.

PROTECT AND RETAIN YOUR TEAM

Improve morale and retention by addressing the safety concerns that lead many frontline workers to feel vulnerable during off-hours.

ELIMINATE OPERATIONAL FRICTION

Drive ROI by replacing manual virtual escorts or inefficient locking procedures with a self-service tool built into the LVT App.

FRICTIONLESS ADMINISTRATION

Manage access with simple PIN generation. No email management is required, and access is revoked instantly by updating the PIN.

PRIVACY-FIRST DESIGN

Maintain employee trust and compliance with a BYOD-friendly application that does not track location or access personal contacts, photos, or messages.
