

GUARDGATE

**SLASH YOUR GUARD SPEND.
SECURE ANY SITE.
SKIP THE CONSTRUCTION.**

Traditional guard posts create a compromise between cost and coverage. Companies pay upwards of \$300,000 a year to staff their guard posts or spend months navigating the permitting and construction of a physical shack. For many smaller or temporary sites, the ROI just isn't there, so they remain unsecured and at risk.

Enter GuardGate. It allows you to slash your guard spend and secure your site the same day it arrives. You get the deterrence power of a manned gate without the six-figure overhead or the construction headaches.

BENEFITS

SLASH GUARD SPEND: Projected guard savings of 30% or more, according to early customer feedback.

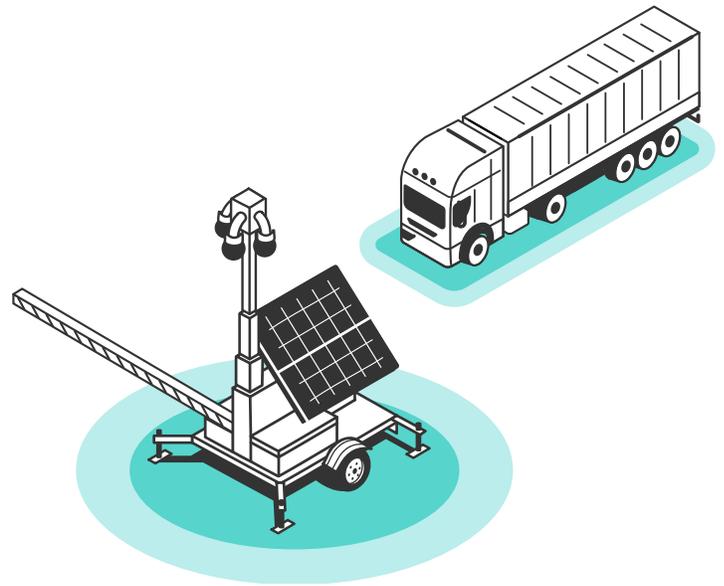

DEPLOY IN HOURS, NOT MONTHS: Bypass the permitting and construction process with a solution that offers instant visibility on day one.

DETER AND DOCUMENT: Leverage LVT's powerful deterrents to stop crime before it happens, and access video evidence to ensure you're covered if it does.

VERIFY EVERY ENTRY: Control the flow of traffic with real-time LVT Command Center alerts and live intercom verification.

SCALE WITHOUT FRICTION: Centralize your security on the LVT Platform your team already knows, eliminating ramp-up time.

SKIP THE UPKEEP: Designed for toolless impact recovery, GuardGate removes costly repairs by easily popping the gate arm or intercom back into place.

FEATURES AND TECHNICAL SPECS

15ft usable arm with toolless bidirectional breakaway design

Adjustable intercom with toolless bidirectional breakaway design

Object sensor to ensure gate safety

Auto-exit camera configuration for departing vehicles
