

LVT

LEVEL UP YOUR SITE INTELLIGENCE

LVT LPR POWERED BY

LVT has partnered with Insight LPR to deliver secure, rugged, and accurate license plate recognition, even in high-speed and low-light environments.

Designed for rapid deployment, our enterprise-grade LPR camera integrates directly with LVT Units to provide a comprehensive security ecosystem across retail, logistics, and other commercial sectors. We prioritize your data sovereignty and ensure all data is controlled by the customer, ensuring you maintain full discretionary control over third-party data sharing.

BENEFITS

PROACTIVE INTERCEPTION Receive automated alerts in under 10 seconds when a vehicle of interest enters your perimeter.

PINPOINT ACCURACY Experience high-fidelity imaging that captures plates clearly in rain, snow, or at speeds upwards of 120+ MPH.

INVESTIGATIVE INTELLIGENCE Use advanced search and predictive analytics to transform scan data into prosecutable evidence.

PRIVACY-FIRST DATA Maintain control with a system that keeps your LPR data securely confined to your specific environment.

SEAMLESS INTEGRATION Easily deploy LPR on a mobile unit without complex infrastructure or expensive and time consuming permitting and construction.

ADVANCED SEARCH TOOLS Geozone, partial plate, plate state, make, type, color, convoy analysis, and NCIC and custom hotlist alerting.
