CASE STUDY

FREIGHT NINJA

LOCATION: CHICAGO, IL & MULTI-SITE (MIDWEST)

INDUSTRY: LOGISTICS, INDUSTRIAL OUTDOOR STORAGE, PROPERTY MANAGEMENT

Freight Ninja is an Industrial Outdoor Storage (IOS) company that manages truck, trailer, and cargo parking across the Midwest. As Freight Ninja scaled, organized theft networks began targeting its off-grid yards. In one instance, thieves stripped seven CPC units from seven trucks in under two minutes, costing \$30,000 in a single night. Manned guards and fixed cameras were ineffective.

THE SECURITY UPGRADE THAT PAID FOR ITSELF IN ONE THEFT

With existing solutions that were neither cost-effective or a deterrent, COO Chris Lantz searched for a permanent fix, and found one in LVT. As Freight Ninja deployed LVT units, everything changed: sales increased, parking lot incidents decreased, and AI talk-down stopped intruders before they could act.

“We saw immediate results with LVT, one theft cost us \$30,000, we made our money back in one prevented theft”

— CHRIS LANTZ
COO

RESULTS

Deterrence Rate of intruders stopped by AI talk-down

Sales Increase LVT on site drives trust and new contracts

\$20K /Month Costs Savings eliminating manned guards.
