

# CRITICAL INFRASTRUCTURE

- » SECURE PERIMETERS AND ELIMINATE BLIND SPOTS AND GAPS IN COVERAGE
- » PROACTIVELY DETER THEFT, VANDALISM, AND TAMPERING WITH AI-DRIVEN SOLUTIONS
- » GAIN VISIBILITY ACROSS ALL SITES
- » MANAGE SECURITY FROM ONE SINGLE PLATFORM
- » COLLECT BUSINESS INTELLIGENCE TO IMPROVE OPERATIONS

*“Because our locations are so remote, response time for local law enforcement is the better part of an hour. The cameras not only give us a preliminary view so we can decide if we need to call the police, but also help us deter crime.”*

**—PHIL BROPHY**  
Head of Security Services USA and Canada  
ENEL NORTH AMERICA
