

LVT INTEGRATES WITH GENETEC

GENETEC IS THE #1 REQUESTED INTEGRATION for LVT enterprise customers, quickly securing any environment through intelligent automation and actionable insights. This integration aggregates LVT's Live Units into a centralized platform, making it easier for security operators to respond to live events within their existing architecture.

THE REAL-TIME OPERATIONS PLATFORM THAT CONNECTS LIVE VIDEO AND FIELD DATA IN ONE UNIFIED VIEW

BENEFITS:

- » Eliminate the friction of switching between systems by bringing LVT Units into your primary Genetec surveillance workflow.
- » Improve response times and real-time awareness for operators and responders.
- » Quickly and easily secure any site with LVT Units that act as a native part of your existing infrastructure.

USERS CAN:

- » Stream live video feeds
- » Take full control of LVT cameras via PTZ commands
- » Remotely activate LVT deterrence features:
 - Strobe lights and floodlights
 - Pre-recorded talk down messages
- » Easily add LVT Live Units to the Genetec Security Center.
