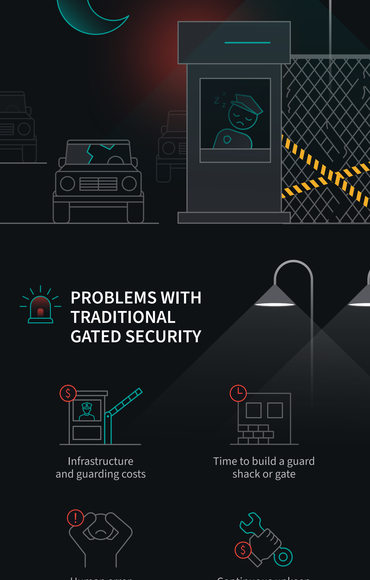
ACCESS POINT CONTROL: A RAPIDLY DEPLOYABLE, FLEXIBLE SOLUTION

Traditional gated security and manned guard shacks are cost prohibitive, permanent, and slow to implement. Economic shifts and the rise of remote operations require flexible, scalable solutions.



PROBLEMS WITH TRADITIONAL GATED SECURITY

Infrastructure and guarding costs

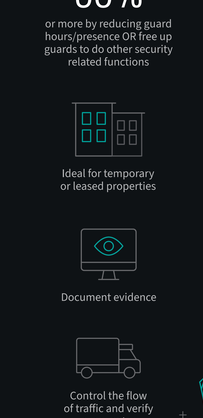
Time to build a guard shack or gate

Human error

Continuous upkeep

Cost prohibitive to upgrade existing infrastructure

COSTS OF TRADITIONAL GATE SECURITY



$65,000
Physical Infrastructure

$20,000
Gate and Barrier Hardware

$500
Permits

$85-100k
All In Cost

Staffing Costs for On-Site Guards

$350k-425k
annually (x2 = $850k, x3 = $1.3m)

~3-6 months to repair a broken gate

MOBILE, RAPIDLY DEPLOYABLE GUARDGATE

Cut guard spend by

30%

or more by reducing guard hours/presence OR free up guards to do other security related functions

Physical infrastructure costs

$0

Deploy in days, not weeks

Ideal for temporary or leased properties

Deter crime before it happens by leveraging LVT's AI technology, enjoying peace of mind knowing the access point is secured

Document evidence

Control the flow of traffic and verify every entry
