LVT

STOP SIFTING AND START SOLVING WITH INTELLIGENT INVESTIGATIONS

Crime drains your time and money, especially when teams spend hours playing digital detective. LVT Intelligent Investigations transforms dormant video into an active intelligence asset so your team your team can ditch the manual scrub and instantly locate specific events using simple text descriptions. Plus, the LVT Intelligent Investigations package will grow with new search capabilities and exciting functionality designed to further optimize your incident response.

ACCELERATE EVIDENCE GATHERING WITH FORENSIC SEARCH

Manual video search is a slow, error-prone process that forces users to scrub through hours of footage just to find a single critical moment. Forensic search revolutionizes this by leveraging plain language queries like “man in a red hoodie getting out of car” to rapidly filter through alert clips for specific people, activities, or items. This straightforward tool allows users to surface relevant evidence across your entire property portfolio without needing specialized technical skills or hours of combing through video.

UNBLOCK INVESTIGATIONS WITH PLAIN LANGUAGE

Beyond the technology, LVT Intelligent Investigations is about reclaiming your team’s time and accelerating the path to resolution. By cutting the process of finding evidence from potentially days or weeks to just minutes, you eliminate the delay that often causes investigations to stall or be abandoned. This efficiency ensures that your security personnel can spend less time behind a monitor and more time collaborating with law enforcement or focusing on high-value operational tasks that protect your bottom line.

Stop the hunt for evidence and start finding answers. Contact us today to learn how LVT Intelligent Investigations and LVT Forensic Search can help you cut investigation times from days to minutes.
