PROVIDE INSTANT, PERSONALIZED DETERRENCE WITH INTELLIGENT SAFETY

Intelligent Safety from LVT provides proactive deterrence for every environment. Powered by SafeNow, this package puts active security directly into the hands of your workforce to protect employees, subcontractors, and vendors.

As our platform evolves, the LVT Intelligent Safety package will keep pushing boundaries with new features and functionality designed to meet your growing security needs.

UNLOCK PROACTIVE, PERSONALIZED DETERRENCE WITH SAFENOW

A single swipe triggers floodlights, strobes, and audio warnings to clear a path and send a clear message in real time. Built right into the LVT mobile app, SafeNow cuts the red tape by replacing manual virtual escorts or inefficient locking procedures. Users maintain a two-stage response, prioritizing on-site deterrence to stop threats before they approach while keeping a direct bridge to 911 for emergencies.

ACHIEVE FRICTIONLESS ADMINISTRATION

Administrators can manage access with simple PIN generation, requiring no email management and allowing for instant revocation. The privacy-first, BYOD-friendly design ensures employee trust by never tracking location or accessing personal data. By addressing the safety concerns that lead frontline workers to feel vulnerable, LVT Intelligent Safety helps improve overall team morale and retention because a safe crew is a happy crew.

Improve employee confidence and safety with on-demand deterrence tools. Contact us today to learn how we can help you provide a safer environment across your entire site portfolio.
