FasalJet Pro Irrigation & Fertigation Automation System

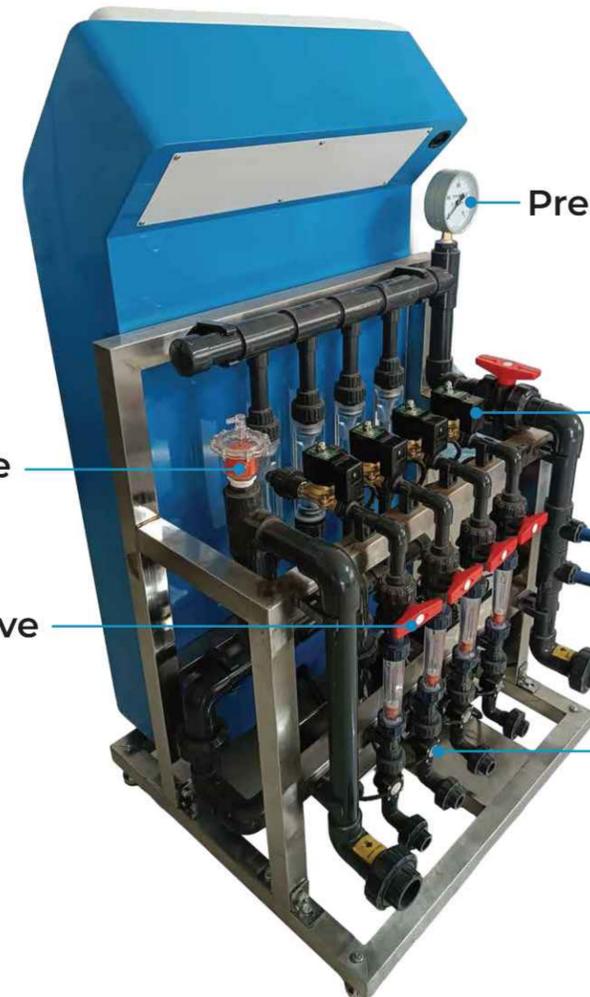

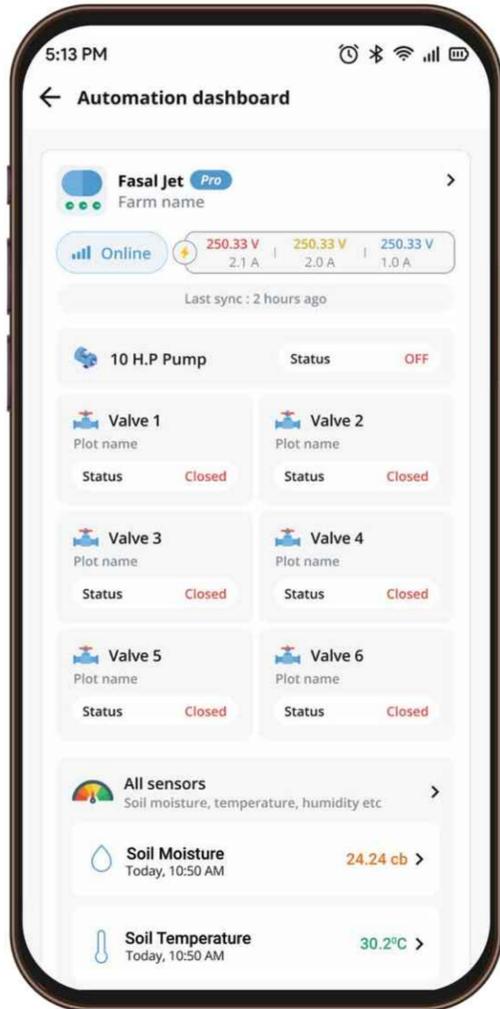

Doorstep
Delivery & Service

1 Year Warranty

Smart Touch Screen

Pressure Gauge

Fertigation Tank
Solenoid Valve

EC-pH Sensors

Flow Sensor

Air Release Valve

Manual Flow Control Valve

Features of FasalJet Pro Automation System

- Start, stop or schedule irrigation and fertigation from mobile or touch screen
- EC monitoring & pH control mechanism with controlled acid dosing
- Flow sensor available with each venturi for accurate monitoring of fertilizer or acid dose
- Mobile alerts in case of power failure during the irrigation & fertigation cycle or before a scheduled cycle
- Auto Resume Feature – if power goes out during irrigation & fertigation, the system resumes automatically from where it left off once power returns
- Farmers can operate irrigation & fertigation cycles based on time and sensor triggers
- Multi user access available
- Maintains plot-wise records of all irrigation & fertigation activities
- Compatible with both centralized (all drip valve at one place) & decentralized (drip valve at different place) irrigation setups

Benefits of FasalJet Pro Automation System

- Save fertilizer, water, time and effort
- No need to visit the field at night–ensures safety from wild animals
- Reduced dependency on labor
- Get online support from agronomist for all your irrigation and fertigation questions and assistance
- Uniform fertilizer distribution with irrigation ensures better crop nutrition and increase in yield
