

BOWING WALLS?

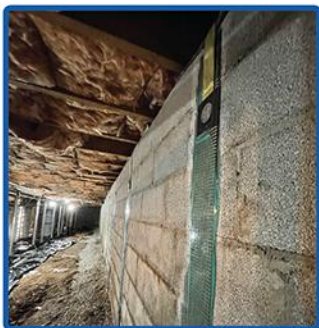

Restore the integrity of foundation walls with InvisiBeam® basement wall repair.

BASEMENT WALL REPAIR

Common Causes

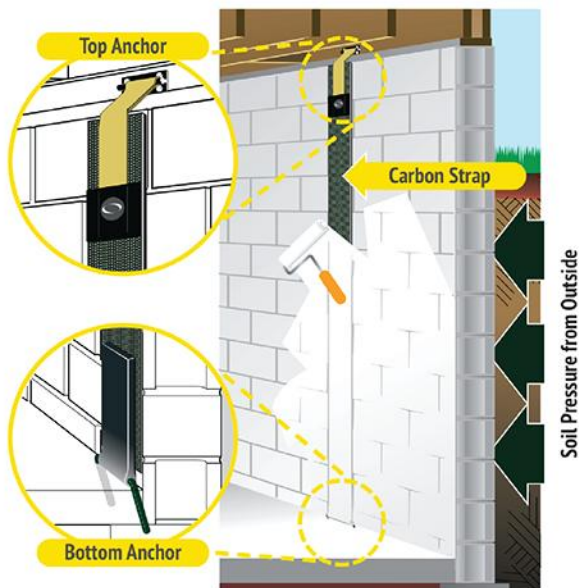

- Hydrostatic pressure from excess water in soil
- Seismic activity, natural disasters
- Poor wall design
- Expansive soil

Ox solutions may include steel wall braces, helical tie-back installation, and/or InvisiBeam® by Fortress Stabilization Systems, which is the strongest carbon fiber strap available. Ultimate tensile strength of 234,000 psi, creates unmatched support for basement walls, making them even stronger than they were before first built.

Keeping Homes Dry & Stable

- Carbon-Kevlar® strap installation
- Steel wall brace installation
- Helical tie-back installation
- Caulk, epoxy, mortar for crack fill, tuckpointing

A complete system: ICC-ES certified, lifetime warrantied, backed by manufacturer.
