I'm human

Louise Simmers holds a bachelor's degree in nursing from University of Maryland and master's in education from Kent State University. She has worked as a public health nurse, medical-surgical nurse, coronary care nurse, and instructor for practical nursing and diversified health occupations. Louise received the Vocational Educator of the Year award and Diversified Health Occupations Instructor of the Year Award for Ohio. Karen Simmers-Nartker graduated from Kent State University with a bachelor's degree in nursing. She has worked as a telemetry step-down nurse, medical-surgical nurse, and neurological ICU nurse. Karen is certified by Emergency Nurses Association for Trauma Nursing Core Course (TNCC) and American Heart Association for Advanced Cardiac Life Support (ACLS). As charge nurse in an ICU, she manages patient care, staff assignments, and interpersonal conflicts. Sharon Simmers-Kobelak holds a bachelor's degree in business administration from Miami University. She is employed as an integrated solutions specialist in educational publishing industry. Sharon assists instructors at private career schools to find classroom materials and provides training on digital assets and resources. She achieved President's Club status for two years, number-one representative status for one year, and consistently met her quota over 20 years. Janet Fuller graduated from Bellevue University with a degree in Healthcare Administration. She obtained Texas LVN nursing license and teaching certification. Janet has worked as medical-surgical nurse, clinic lead nurse, surgical clinic nurse, and home health nurse. She developed and instructed certified nursing assistants at South Texas School of Nurse Aides, LLC. The Diversified Health Occupations (DHO) text is updated to DHO HEALTH SCIENCE, providing an all-in-one resource for introductory coursework in the health science curriculum. The updated Eighth Edition of DHO Health Science provides foundational information for entry into various health professions, including infection control, first aid, legal requirements, and professionalism. It also covers fundamental skills for specific careers like medical assisting, dental assisting, and more. The revised edition includes recent updates such as the Patient Protection and Affordable Care Act, U.S. Department of Agriculture guidelines, and Enhanced National Healthcare Foundation Standards to prepare students for success in today's health science careers. Chapter 7 through Chapter 18 cover various health care topics such as anatomy, physiology, human growth and development, geriatric care, cultural diversity, nutrition, medical math, infection control, vital signs, first aid, and more. Chapters 19 to 24 delve into specific skills like dental assisting, laboratory assisting, and physical therapy. The appendices provide additional resources, including career organizations and conversion charts. Louise Simmers earned a nursing degree from the University of Maryland and an education degree from Kent State University. She worked as a public health nurse and has received awards for her work in vocational education and diversified health occupations instruction. Karen Simmers-Nartker holds a nursing degree from Kent State University and has experience working in various intensive care units, including obtaining certifications in trauma nursing and advanced cardiac life support. Sharon Simmers-Kobelak graduated with a business degree from Miami University (Ohio) and works as an educational publishing specialist, helping instructors find materials and providing training on digital assets. Janet Fuller earned a health care degree from Bellevue University in Nebraska. She earned her Texas LVN license from St. Philip's College and a teaching certification from Region 13 in San Antonio. Ms. Fuller has worked as various types of nurses, created and taught nursing assistant courses at South Texas School of Nurse Aides, LLC, and is involved with HOSA and other health-related organizations. The textbook used by students includes real-world case studies, discussions on current issues like the opioid crisis, critical thinking questions, small group activities, and a focus on HIPAA, EHRs, and cross-curricular skills. It provides a comprehensive foundation in medical terminology, anatomy, communication, legal requirements, and professional standards, aligning with national healthcare standards and industry-recognized credentials, including those for NCHSE and Precision Exams. A digital package is also available for teaching and learning, featuring MindTap resources. A comprehensive teacher's resource package is available in either print or digital format. The kit includes lesson plans, quizzes, classroom activities, academic connections, and visual aids. To learn more about these supplementary materials, please reach out to your Learning Consultant as they are updated alongside the main textbook selection.
