Medical assisting: administrative and clinical procedures 7th edition

Kathryn Booth, a registered nurse with a master's degree in education, has over three decades of combined experience in teaching, nursing, and healthcare across five states. Certified in phlebotomy, pharmacy tech, and medical assisting, she is also an author, educator, and consultant for Total Care Programming, Inc. As an educator, Kathy has received the teacher of the year award in three states where she taught various health sciences, including medical assisting. She currently serves on the AMT Examinations, Qualifications, and Standards committee and advisory boards for two educational institutions. Leesa Whicker is a Certified Medical Assistant with over 20 years of teaching experience and a BA in art with a concentration in art history. With 35 years of healthcare experience as a medical assistant, research specialist, and program director, she has developed curriculum expertise serving on committees like the North Carolina Community College System's Common Course Library Writing Team. Leesa remains active in online curriculum development and presents innovative learning methods nationally. Terri Wyman has 35 years of healthcare experience, first as a CMA specializing in hematology/oncology and homecare, then in medical billing and coding. She transitioned to education as an instructor and program director for several technical schools in New England. Currently, Terri is the financial applications analyst at Baystate Wing Hospital, where she continues teaching in the hospital setting. She is active with her local AAPC chapter and serves on the National Advisory Board for the American Medical Billing Association (AMBA). ICD-10 She continues to share billing and coding knowledge with instructors, students, and professionals. Terri thanks Dale for his support and Francis Stein, MD, for showing her the joy of learning. Rating: 4.5/5 based on customer reviews by Kathryn Booth and Leesa Whicker. Format: Original PDF/Print Replica Publisher: McGraw Hill Language: English ISBN-10: 1259608549 ISBN-13: 978-1259608544 The medical assisting field is evolving with new roles and changes in healthcare. Medical assistants must adapt to multiple tasks. This book, now in its seventh edition, was updated to help students and instructors learn these changes. Leesa Whicker has a background in art and is an educator with over 20 years of experience. She has worked in the healthcare field for 35 years as a medical assistant and instructor. Leesa teaches at Central Piedmont Community College in Charlotte, North Carolina, focusing on innovative teaching methods. Terri Wyman also has extensive experience in the healthcare field, having worked as a medical billing and coding specialist and instructor. She currently works as a financial applications analyst at Baystate Wing Hospital. Conferences on ICD-10 and other medical coding topics are just one aspect of Terri's passion for sharing billing and coding language with professionals. Her dedication to this field is matched only by her excitement about continuing education in the rapidly changing world of healthcare billing. She extends her gratitude to Dale, who has provided unwavering support throughout her career, as well as Francis Stein, MD, who instilled in her a love for learning that began many years ago when she was first starting out as a medical assistant. As a registered nurse and educator, Kathryn Booth brings over 30 years of experience to the table. With certifications in phlebotomy, pharmacy tech, and medical assisting, Kathy is well-versed in healthcare education. Her numerous awards for teaching excellence demonstrate her commitment to helping students succeed. In addition to her work as an author, consultant, and educator, Kathy serves on several committees and advisory boards, ensuring that she stays current with the latest developments in healthcare education. With 35 years of experience in healthcare, Terri Wyman has built a reputation as a dedicated instructor and program director for medical assisting and billing programs. Currently working as a financial applications analyst at Baystate Wing Hospital, Terri is always looking for new ways to share her knowledge of medical coding with professionals nationwide. Her passion for teaching shines through in her work as an author, speaker, and continuing education provider for the American Medical Billing Association (AMBA). She is a program director and instructor with a broad background of knowledge and experience. As a curriculum expert, she has served on several committees, including the Common Course Library for the North Carolina Community College System and Central Piedmont Community College's Curriculum Committee. Leesa developed online courses and remains active in online curriculum development. Her expertise includes methods of active and collaborative learning, which she has presented nationally. Kathryn A. Booth is a registered nurse with a master's degree in education, certifications in phlebotomy, pharmacy tech, and medical assisting. She is an author, educator, and consultant for Total Care Programming, Inc., bringing over 30 years of teaching, nursing, and healthcare experience to her work. As an educator, Kathy has been recognized as Teacher of the Year in three states and serves on committees for AMT Examinations and Qualifications, as well as advisory boards for two educational institutions. She stays current through ongoing practice and certification maintenance. Her goal is to develop dynamic healthcare educational materials and promote healthcare professions, while presenting innovative learning solutions nationwide.
