Redback boots size guide

****About Redback Boots**** Redback Boots UK is a trading name of Tradewinds Outdoors Ltd, a UK-based company that specializes in manufacturing high-quality boots. Our website and physical store are located at Unit 8, Jubilee Way, Faversham, Kent, and can be contacted via phone (+44) 01795 53 43 43 or email (stomp@redbackboots.co.uk).

****Sizing Guide**** Redback Boots use the UK sizing system, which is different from US sizes. To convert US size to Redback Boot UK size, please refer to our size chart below. Note that UK sizes are equivalent to one size smaller than US men's size and 2.5 sizes smaller for women. ****Redback Boot Sizing Chart**** The following chart shows the equivalent UK sizes for Redback Boots: | AU/UK Men | US Men | US Women | | --- | --- | | 4 | 6.5-7 | 3-4 | | 4.5 | 7-8 | 4.5 | | 5 | 8-9 | 5-6 | | 5.5 | 9-10 | 6-7 | | 6 | 10-11 | 7-8 | ****Fitting Tips**** Redback Boots are designed to fit comfortably with thick work socks and our leather insoles, which can be purchased separately. If you find your boots too loose initially, try adding a leather insole and wearing thick work socks for the ultimate comfort package. ****Important Notes**** * Redback Boots are manufactured in Australia using AU/UK size guides. * Sizes may vary slightly due to natural materials used. * Half sizes offer a roomier feel with the same length as full-size boots but with added width. * Please refer to our Refund Policy or contact us directly if you have any concerns about sizing. ****Redback Size Guide**** The following chart shows the Redback Boot size equivalents for US men's and women's sizes: | Redback (AU/UK Men) | Foot Length (mm) | | --- | --- | | 2 | 220 | | 3 | 230 | | 4 | 235 | | 4.5 | 235 | | 5 | 245 | | 5.5 | 245 | | 6 | 250 | | 6.5 | 250 | | 7 | 260 | | 7.5 | 260 | | 8 | 270 | | 8.5 | 270 | | 9 | 280 | | 9.5 | 280 | | 10 | 290 | | 10.5 | 290 | | 11 | 295 | | 11.5 | 295 | | 12 | 305 | | 13 | 310 | | 14 | 315 | | 15 | 320 | We hope this information helps you find the perfect fit for your Redback Boots! Redback Boots sizing can be a bit tricky, but don't worry, we've got you covered! To get the right fit, you'll need to subtract one size from your US size or two and a half sizes for women. But are Redbacks true to size? Let's dive in and find out! We're covering everything you need to know about Redback Boots sizing, including whether they run big, how to break them in, and what makes them unique. Plus, we'll explore top styles like the Easy Escape, Outback, and Bobcat. One thing that sets Redbacks apart is their comfort. They're designed with anatomic soles to reduce fatigue and have a lightweight outsole for added comfort. And, they're slip-resistant, making them perfect for hazardous environments. The Outback model is ideal for those who prefer lace-up boots, while the Easy Escape is a great option for those who want a no-lace model. The Bobcat ankle boot is a stylish and comfortable choice for everyday wear. To help you find your size, we've included a Redback Boots sizing chart that converts US sizes to UK men's sizes (note: there is no separate women's size chart). Remember, Redbacks are all EEE extra wide, so keep that in mind when choosing the right fit. Given article text here The Importance of Proper Fitting When Trying on Redback Boots When purchasing new Redback boots, it's essential to ensure that they fit correctly to guarantee maximum comfort and prevent discomfort. Here are some valuable tips to help you get the right size. Swelling: Try on your boots in the afternoon or at night when your feet are most swollen. This will help prevent the boots from being too small. Preparation is Key Before trying on your boots, consider what you'll be wearing with them. Orthotic inserts or thick socks can take up a lot of space, so wear them during the try-on process to get an accurate fit. Toe Box Comfort Ensure that the toe box isn't too tight and that your toes aren't crammed at the front, especially with Redback's steel tip models. Heel Fit For laceless models, there should be enough room to slip the boot on without discomfort. For lace-up models, a snugger fit is acceptable. Comfort Check Walk around in the boots to assess how they feel. If you experience any pressure or discomfort, it may be necessary to size up. Arch Support Redback boots have a high arch, which can be uncomfortable for those with flat feet. Ensure that the boot isn't too uncomfortable and consider adding moisture-wicking leather insoles for extra comfort. Breaking in Redback Boots Redback boots are made from natural leather, which means they'll require some breaking-in time. However, this process is relatively quick, usually taking just a few wearings. Tips for Breaking in Your Redback Boots * Wear thick socks when trying on your new boots to make them feel tight. * Use the hairdryer trick by applying heat to specific areas of the shoe to break it in quickly and comfortably. By following these tips and understanding how to properly fit and care for your Redback boots, you can enjoy maximum comfort and longevity. Redback Boots offer both durability and safety features in their work boots, including steel tips that make them more resistant to wear and tear. The boots also have a soft leather interior and comfortable insoles, making them suitable for long hours of work. To ensure the right fit, it's essential to consider Redback's unique sizing system, which is based on UK men's sizes. This means that users who typically wear US men's sizes may need to go down by one size or even two sizes smaller than their usual size. Redback Boots are generally considered comfortable and durable, with many users praising their comfort level. However, those with narrow feet might find the boots a bit loose on the upper part, requiring an insole to take up some of the space. To convert US boot sizes to UK sizes, refer to Redback's sizing chart, which provides a guide for converting between the two measurement systems. The boots are designed to be worn with thick work socks and have an EEE extra-wide fit, making them suitable for individuals with larger foot sizes. When purchasing Redback Boots, it's crucial to order your normal UK size, as they are sized according to official UK sizing guidelines. If you require a slightly wider fit, consider selecting one of the available half sizes, which add 5mm to the width without increasing the length of the boot. Redback also offers a sizing chart that compares US and UK boot sizes, including the corresponding measurements in millimeters for each size. This can be helpful for individuals who need to determine their correct size based on their foot length. To further ensure the right fit, Redback recommends trying on the boots indoors on a carpet for about 20 minutes before taking them outdoors. If you're unsure about your size or have any questions, feel free to contact Redback's customer service team for assistance. We take online data protection seriously at Redback Boots UK and aim to put your personal information at the forefront.
