How do you win 49 lottery uk

The UK National Lottery began in November 1994 with the aim of increasing interest in chance and probability, as well as improving numeracy. In its early days, newspapers often published articles that identified certain numbers as "due" or "hot", which was a practice similar to racing tipsters studying form. Despite this, it is now generally believed that each draw is independent and has an equal chance of outcome. The game has strict rules regarding prize money and allocation, allowing players to calculate their winning chances and potential prizes. Players must choose six numbers from 1-49, with the seventh number being the Bonus. Winning at least three main numbers earns a prize, while matching all six can lead to a share of the Jackpot, which can be worth £2 million or more. However, on average, less than half the money staked is returned as prizes, making it difficult for players to win consistently. With 13,983,816 possible combinations, the odds of winning the Jackpot with one ticket are approximately 1 in 14 million. To increase chances, some players select specific numbers, such as multiples of seven. In any given week, almost one in six times no one wins the jackpot, while roughly one in five times just one person takes home the entire prize. Interestingly, the Swiss Lottery allowed Hans Riedwyl to access player choices for a particular week, revealing that most combinations were chosen about twice on average. However, certain patterns - like previous winning numbers from several years ago or those forming symmetrical shapes on the ticket - attracted significantly more players. It's crucial to avoid such systematic choices as many others might think similarly and some could even copy your selection. A smarter approach is choosing completely at random using a deck of cards or the official Lucky Dip service. Yet, merely spreading numbers evenly across the card does not equate to true randomness. Riedwyl's advice includes selecting towards higher numbers to counter family birth date bias, aiming for totals above 177 and avoiding clusters or isolated numbers. While this doesn't improve winning chances, it might lead to larger prizes. The chances of winning each prize level on the lottery can be calculated using a combination formula. For example, to win exactly five of the six Good numbers along with one of the 43 Bad numbers makes $6 \times 43 = 258$ possible winning tickets. Similarly, there are $\$^{6}C_4 = 15$ ways to select four of the six Good numbers and two of the 43 Bad numbers, giving a total of 13,545 combinations that match exactly four winning numbers. The fixed Match 3 prize gives $\$^{6}C_3 \times 43 = 246,820$ choices. To calculate the overall number of possible winning tickets, we can use these formulas: $N = \$^{6}C_5 \times 43 + ^6C_4 \times 43 \times 43 + ^6C_3 \times 43 \times N = 6 \times 258 + 15 \times 903 + 246,820 \times N = 1,538 + 13,545 + 246,820 \times N = 260,903 / N$. The probability of winning something is then $260,903 / N$. Statistical analysis suggests that the best strategy for winning more than average amounts is to choose combinations that other players tend to avoid. This can be done by analyzing data on jackpot winners and identifying patterns in the winning numbers. In a sample of 850 draws, there were: * 40 occasions with three consecutive numbers * 406 occasions with two consecutive numbers These findings suggest that fewer than expected jackpot winners occurred when certain patterns appeared, resulting in higher prizes. However, overall jackpot winner rates remain lower than expected in such cases as well. The UK 49s lottery has gained popularity, and its results are widely shared in the press. If enough people change their habits, new combinations may become more profitable. When entering the lottery, making a random selection of numbers can be beneficial. John Haigh, a mathematician and statistician, suggests this approach in his book "Taking Chances." The UK 49s lottery has two daily draws, each using the same mechanics as the other. Players must choose six numbers and one booster number from a pool of 1-49 to participate. The seven-number draw with the booster ball is recommended for a better chance of winning. Bosman Lottery Guru's comprehensive guide to UK's popular 49's lotto game, covering its history, mechanics, and various betting options. Through in-depth research and experience playing the game on different platforms, we've identified the best value lottery games worldwide. Quick Links What is UK 49's? UK 49's is a national lottery game operated by Satellite Information Services, offering an alternative to official lotteries. Since its launch in 1999, it has become popular in South Africa and the UK. How does UK 49's work? Each draw features seven numbers: six main numbers and a bonus ball. Players bet on the outcome of the draw, not the draw itself, choosing from various bet types at odds provided by bookmakers. To start playing, sign up for an account with an online bookmaker, select your bet type, place your stake, and confirm. How to Play UK 49's With flexible staking options, players can wager as little or much as they like, but most bookmakers impose limits. The game offers various ways to play: Straight (up to six numbers), Straight plus Bonus Ball (four numbers plus the bonus ball), Combination (up to 14 numbers with single bets or a stake of £1 per number), and other bet types. • Unlucky Numbers: Choose up to 12 numbers and bet that they won't be drawn. • First Number Drawn Bet: Place a wager on the first number that will be drawn in the next draw, from 1 to 49. • Total Value of Main Six Drawn Numbers: Bet on the total value of the six main numbers. • Odd or Even of First Ball Drawn: Wager on whether the first ball drawn will be odd or even. • Colour of First Ball Drawn: Bet on the colour of the first ball drawn, with green being one of 14 colours and red being the remaining 35 colours. • HiLo Bet: Place a wager on whether each individual ball drawn will have a value under 25 or over 25. • Odd/Even of Each Ball: Wager on whether each individual ball drawn will be an odd or even number, with some bookmakers offering bets on all six main balls being odd or even. • Over/Under Bets: Some bookmakers offer bets on the lowest and highest numbers being over or under a specific value. • Specials Bets: Look out for special offers from some bookmakers, which may include attractive odds for specific bets and combinations. Is the draw? With two draws per day, you have plenty of opportunities to win significant sums. Draws take place daily, including Christmas and Easter. A lunchtime draw occurs at 12:49 UK time, while an evening draw is held at 17:49 UK time. Results are broadcast live in participating bookmakers and published on the official website after each draw. You can purchase tickets up to 15 minutes before each draw. Advance Play isn't available like it is with other lottery games, as you must bet individually on each specific outcome. However, some bookmakers allow you to bet on future draws, whether it's in a few days or three to four weeks. The maximum amount you can win varies depending on the type of bet, odds, and stake. Each bookmaker has its own limits. If playing online, you'll see your potential prize after selecting your bet and adding your stake. You can change your bet or stake before confirming if you're not satisfied with the offer. Hot and Cold Numbers While all numbers have an equal chance at the start of each draw, certain numbers are drawn more frequently than others. You might find it beneficial to consult the Hot and Cold numbers when choosing bets. We've included these on this page for your convenience. The odds depend on the bookmaker and specific bets. Look at different bookmakers to find the best odds for your desired bets. Where to play 49's in the UK? You can only play 49's at participating bookmakers, either online or at physical betting shops. Bookmakers where you can play 49's include Bet365, Betfred, Ladbrokes, William Hill, Coral, YesPlay, BoyleSports, SkyBet, and Paddy Power. How to play 49's online in the UK? Each bookmaker offers different bet types. Here's an overview of what each bookmaker offers: Bet365 - Straight, Combination, First Number Drawn, Total Value of Main Six Balls, and more; Betfred - Straight, Combination, Odd/Even, Total Value of Main Six Balls, and more; Ladbrokes - only Straight bets; William Hill - only Straight bets; Coral - only Straight bets; YesPlay - most comprehensive list of bet types, including Unlucky Numbers, HiLo, Divisible Numbers, and more; BoyleSports - Straight and Combination bets; SkyBet - First Number Drawn, Total Value of Main Six Balls, Specific Number to be Drawn, Bonus Ball Number, and more; Paddy Power - only Straight bets. Where can I get the best UK 49's odds in South Africa? Compare UK 49's odds from South African bookmakers. Best UK 49's odds in South Africa include Bet.co.za, INTER bet, and Betolimp. In South Africa, players can bet on UK 49's at various bookmakers, both online and at physical locations. The available bookmakers include Bet.co.za, Betway, Hollywoodbets, YesPlay, VegasBets, Supabets, Morris Vee, Gbets, Scorebet, SPORTSBET, World Sports Betting, betting WORLD, SoccerShop, and KayaMoola. Each bookmaker offers a range of bet types for UK 49's, including: * Straight bets * Bonus Ball bets * Combination bets * Hi-Lo bets * Odd/Even bets * Divisible numbers bets * Specific number bets * Bonus Ball Hi-Lo and Odd or Even bets Some bookmakers also offer additional features, such as the option to play with a single digit for bonus ball bets. When it comes to odds, some bookmakers display them in fractional format (e.g. 5/1), while others use decimal format (e.g. 6.5). Players can change the display format of odds in their online account settings if preferred. For KayaMoola, players must pick six numbers and various prizes are offered. For other bookmakers, specific bet types may have varying odds or requirements. Overall, UK 49's betting is available at multiple bookmakers in South Africa, offering a range of bet types and features to suit different player preferences. Importantly, this guide explains how fractional odds work in 49's, a UK-based game. Fractional odds display numbers like 3/1 and 13/2. To calculate winnings, divide the first number by the second, then multiply by your stake. For example, if the odds are 3/1 with a £10 stake, you'd win £30 plus get your stake back, making your total return £40. Decimal odds are simpler, with only one calculation needed. If the decimal odds are 4.0 and you have a £10 stake, you'll get £40 if you win. Bookmakers offer different odds due to their profit margins. Some may sacrifice short-term margin for long-term gains by offering better odds. As a player, you can maximise winnings by playing with bookmakers that offer the best odds on your preferred bet types. In the UK and South Africa, there are no fees or commissions on gambling winnings. However, players from other countries should check local laws regarding taxes on their 49's winnings. There may be discounts and bonuses available when signing up for a new online bookmaker account, but these are generally paid as free bets with specific requirements. To claim your 49's winnings, if playing online, the cash will be paid into your online account, allowing you to bet or withdraw it according to the bookmaker's terms. In physical betting shops, you can claim your winnings immediately. Results have been confirmed. Depending on the bookmaker you're using and how much money you've won, you'll usually be able to collect your winnings in cash, unless payment limits or restrictions apply. Some betting shops allow you to place bets in person and receive online payments through a special card. Is it possible to play 49's via mobile app? Yes, as long as the bookmaker offers this feature on their own mobile apps available for download from iTunes or Google Play stores. Similar games to 49's can be found in Irish Lotto, which is widely offered by UK bookmakers and some international ones too. This game gives you more flexibility with different types of bets and odds, but it has one key difference - three daily draws instead of two. The presenters of 49's are Gina, Harriet, Helen, Kirstie, Sophie, and Tony, who can be found on the official website along with some interesting facts about them.
