The soothing soundscape of Minecraft has captivated gamers worldwide, thanks to C418's masterful compositions. Crafting enchanting tunes for this relaxing game is no easy feat - the music should uplift and intrigue without overpowering the player's creative focus. The enigmatic music discs, on the other hand, offer a delightful treat for collectors, each with its own distinct melody that adds a dash of personality to the gameplay experience. As Minecraft continues to evolve, new updates bring fresh surprises, like Lena Raine's enchanting track "otherside" in the 1.18 update. This guide will walk you through where to find this gem, what it sounds like, and more. Moreover, with farming now possible, you can stock up on music discs at your leisure. Let's dive into the world of Minecraft's musical treasures. To start, you'll need to know where to find these elusive discs. In the Java version, only two locations hold a chance for loot: regular mob dungeons and Woodland Mansions. Each has its own risks and rewards - while mob dungeons offer a quick score, the dangers within the Mansion make it a high-risk venture. However, with Lena Raine's addition to the Minecraft universe, new paths have emerged. "Pigstep" can be found in Bastion Remnants, while "otherside" is a rare spawn in Dungeon chests or Stronghold altar chests. For Bedrock Edition players, buried treasure chests hold secrets like "mellohi" and "wait", while Creeper-hunting becomes a thrilling adventure. To farm music discs, locate a Skeleton dungeon and create water streams to guide the Skeletons into one place. Implement a minecart system to transport them whenever you need to. For bonus points, add hoppers to farm bones and arrows. To minimize Skeleton buildup, use redstone lamps to toggle spawning rates. With these secrets in hand, you'll be well on your way to collecting every music disc Minecraft has to offer - and enjoying the game's enchanting soundtrack to the fullest! ========== You'll have fewer Creepers spawning in total if you spend time setting up your Skeleton dungeon and transporting them to a new location. First, create the tunnel through which the Skeleton will see you while it's attacking the Creepers. This should be around 1x1 block wide with deeper areas for both Skeletons and Creepers to stand on. The idea is that the Skeleton can use this tunnel to target the Creepers more efficiently. Once your tunnel is set up, decide where you want to place the Creepers and build a hopper below them. Next, create a 21-block drop area above the hopper. This will reduce the health of any Creeper that falls into it, making it easier for the Skeleton to finish them off after repeated shots. Above this 21-block area, build a Creeper farm using one method you find effective and place your Creepers in it. Then, funnel them into the drop area, allowing you to summon a Skeleton from its spawner while you stand in front of the tunnel, ready to bait it into shooting at the Creepers. You'll not only obtain music discs but also gunpowder when a Skeleton is summoned. Music discs need to be placed inside jukeboxes to play and can be found in most homes with fancy decorations. Jukeboxes are crafted using eight wooden planks of any kind, one diamond in the center, and don't require redstone power. Each music disc has a unique sound that's somewhat bizarre and otherworldly, often drawing inspiration from real-world music. They're categorized into different signals, which can be detected by comparators or jukeboxes when playing them. For instance, the "13" disc features an ambient track, while "cat" is more melodic with a mix of percussive elements. Jukeboxes come with various signal strengths depending on the edition of Minecraft and can even give off audible signals from a distance, making for interesting contraptions like doors that respond to specific discs. There are 14 different music discs in total, each with its distinct style and musical influences, offering a wide range of possibilities for creative gameplay and decoration.Music discs in Minecraft are unique items that play special soundtracks when used in a jukebox. There are a total of 15 different music discs, some of which only play instrumental music, while others have hidden meanings about the game's mysterious storyline. Obtaining these music discs can be challenging as they are rare. Some music discs can be found in naturally generated structures such as Dungeon chests, Ancient City chests, and Woodland Mansion chests. Others can be obtained by killing a hostile mob in a specific way or from a Creeper. For example, some music discs can only be dropped by a Creeper when killed by an arrow shot from a Skeleton, Stray, or Wither Skeleton. A few music discs are unique to each generation of Minecraft, such as the "mellohi" and "wait" discs in Bedrock Edition. The latest music disc called '5,' which was added with the Minecraft 1.19 update, is an exception as it can only be obtained by collecting nine fragments. Obtaining all the music discs in Minecraft 1.19 requires patience and persistence. Here's a guide on where to find them: # Music Discs found in chest loot * Dungeon chests * Ancient City chests * Woodland Mansion chests * Music Disc cat (Bedrock Edition only) * Music Disc wait (Bedrock Edition only) # Music discs obtained from a Creeper * blockschirpfarmallstalmellohistradward11wait To get the entire disc, you must collect nine fragments to craft the item. Some music discs can be obtained by killing a hostile mob in a specific way or from a Creeper. Music discs are fascinating items that add an extra layer of depth to the Minecraft game.Pigstep Music Disc: How to Get it in Minecraft To get the Pigstep music disc, first explore the location where you can find it. In Survival Mode, Pigstep can be added to your inventory by finding one in the Nether. In the Bastion Remnant, search for a chest. The Chests may be hidden within each other and will have different items. Once you've found a Chest, open it to see what's inside. If you're lucky, you'll find a music disc, but the chance is small. Don't give up if you can't find one right away. Pigstep is only obtainable in the Nether and Bastion Remnants. They are big structures that resemble castles and are found in all biomes except basalt deltas. Piglins can spawn in these structures, as well as Hoglins, which generate in treasure rooms guarded by Piglin Brutes. The music disc has a strong beat with mellow parts reminiscent of radio. It features flying bacon in the background and is part of the Minecraft Nether Update soundtrack. Pigstep is available in various versions of Minecraft, including Java Edition and Pocket Edition.In the vast world of Minecraft, music plays a vital role in shaping the ambiance and creating a unique experience for players. The game's soundtrack, composed by C418, is a masterpiece that has captured the hearts of many. With 13 official music discs to discover, players can add a new level of depth to their gameplay. To get all the music discs, players must be strategic in their approach. One method involves defeating Creepers with arrows, while another relies on Chests. However, not all discs are easily obtainable, and players must be prepared to explore different methods to collect them. The 13 music discs, each with its unique characteristics, can be ranked based on player preferences. At the top of the list is Wait, a cheerful remix that has captured the hearts of many. Cat, Strad, Far, Pigstep, and Mall are also popular among players, offering a range of moods and atmospheres to enhance gameplay. Players can find these music discs by exploring different areas of the game world, including Buried Chests, Woodland Mansion Chests, Dungeon Chests, and Bastion Remnant Chests. Each disc has its own unique sound and characteristics, making them an integral part of the Minecraft experience. The developers of Minecraft have carefully crafted each music disc to create a sense of immersion and wonder in the game world. From the soothing melodies of Far to the tropical rhythms of Strad, each track adds a new dimension to the gameplay experience. In conclusion, the music discs in Minecraft are a vital part of the game's charm, offering players a unique way to enhance their gameplay experience. With 13 official music discs to discover and explore, players can create a world that is both immersive and enchanting. By incorporating these music discs into their gameplay, players can add a new level of depth and complexity to their Minecraft experience. Whether they prefer the upbeat rhythms of Wait or the soothing melodies of Far, each disc has its own unique charm that can enhance the game in ways that few other features can.Pigstep is the best music disc in Minecraft with a hip-hop beat, making it a favorite among those who enjoy R&B or HipHop genres. Unlike other music discs, Pigstep cannot be obtained through the standard method and can only be found in Chests within Bastion Remnants, which spawn exclusively in the Nether. You might need to wander a bit further due to small terrain changes.4. Stronghold next to Ancient City with Mineshaft (Bedrock)This Bedrock seed is like the Java Stronghold one but with a twist: th Stronghold sits abve the Ancient City, and a Mineshaft connect them. You can raid all three for loot and maybe turn them into a huge base linking the surface to the underground.Seed Code: 3621868329803409107Stronghold Coordinates: -1452, -30, -860Ancient City Coordinates: -1448, -44, -632Spawn Biome: Dark ForestNote: Works smoothly in 1.21 Bedrock, with the Mineshaft still tying everything together.5. 19 Ancient Cities (Bedrock)If you're all about Ancient Cities, this seed's for you. It puts 19 of them within a few hundred blocks of spawn. Some are standard, while others mix with nearby biomes for some cool scenery.Seed Code: -2193811972289072796Spawn Biome: Jagged PeaksNote: The city count is still good in 1.21, but coordinates might shift slightly with terrain updates. Explore near spawn or use a biome finder.This seed has a neat cave setup with Deep Dark, Dripstone, and Lush Cave biomes all in one spot. The Ancient City's in the Deep Dark part, with Dripstone and Lush elements making it a fun place to explore.Seed Code: 5114865292213250711Ancient City Coordinates: 584, -44, 168Spawn Biome: TaigaNote: The cave biome mix is still intact in 1.21, great for seeing Minecraft's underground variety.7. Ancient City Under Massive Lush Cave (Java)This 1.21 seed puts an Ancient City right under a huge Lush Cave. The bright vines and glow berries light up your path to the city, but the Warden keeps things intense.Seed Code: 789324156982341Ancient City Coordinates: 312, -43, -456Spawn Biome: MeadowNote: The Lush Cave makes this seed stand out, and it's built for 1.21's terrain.8. Double Ancient City Merge (Bedrock)This Bedrock seed has two Ancient Cities fused into one giant structure in a Deep Dark biome. It's double the loot, but also double the risk with multiple Wardens possible.Seed Code: -392184750128493Ancient City Coordinates: -824, -44, 392Spawn Biome: SavannaNote: The merged cities are rare and work great in 1.21 for a big adventure.9. Ancient City with Exposed Trial Chambers (Java)New for 1.21, this seed places an Ancient City near a partly exposed Trial Chamber. You get the Deep Dark's sculk vibes plus the Trial Chamber's copper and tuff, with loot like Ominous Bottles to grab.Seed Code: 6238914035112897Ancient City Coordinates: -648, -42, 104Trial Chamber Coordinates: -680, -30, 120Spawn Biome: Birch ForestNote: Perfect for checking out 1.21's Trial Chambers alongside an Ancient City.10. Triple Ancient City Cluster (Bedrock)This seed gives you three Ancient Cities close together in one Deep Dark biome. It's great for looting a ton without traveling far, with varied terrain to keep things interesting.Seed Code: 184729305712398Closest Ancient City Coordinates: 632, -44, -520Spawn Biome: SwampNote: The cluster's still tight in 1.21, with minor terrain tweaks not messing it up. Th mathe is abaut da musik in minecraft. one typs /music play namd.pigstep and tha cheet starts palyin th musica. ========== In dis exemple, we ar going to pway th musik track calld re cord pigstep with th folloeing command: /music play record.pigstep Typ th comand in th chat winnow. As you ar typing, you will see th comand appear in th lower left corner of th game winnew. Pres th entir key to run th comand. Onse tha cheet has ben eneterd, tha fog setting wil be addeed. You wil see th mesage "record.pigstep has ben queued to start palyin" appear in th top left corner of th game winnew to indicat tht th comand has succesfully complitd. In dis cas, th musik track calld re cord pigstep will begin palying. Congratulationz, you hav laerned how to us tha /music comand in Minecraft. ==========The tracks of Minecraft sound like old records, with a style reminiscent of 78-rpm phonographs from the early 20th century. They are used in the game in a similar way: a music disc can be played by holding the disc and clicking the right mouse button on the record player. The music tracks released outside of the game are in stereo, while those within the game are monaural.C418, Lena Raine e Samuel Åberg criaram 15 músicas que podem ser ouvidas nos arquivos de Minecraft. ========== Todos os arquivos de música estão no formato .ogg. Os discos de música são largados por creeper atingidos por esqueletos. Antes desta atualização, discos cat eram mais comuns que discos 13. ========== Os discos de música são armazenados junto com os primeiros discos. Antes desta atualização, havia 12 arquivos de música não utilizados, agora apenas um permanece sem uso. ========== A música "where are we now" não foi adicionada ao restante dos discos de música devido a problemas com os espaços no nome. O disco "where are we now" foi renomeado para "wait" e foi disponibilizado no jogo. ========== O toca-discos tocando músicas emite um sinal de redstone quando um comparador é colocado atrás dela; sua força depende do ID numérico do disco inserido. Agora, discos de música personalizados podem ser criados usando pacotes de recursos. ========== Diminuição do rendimento médio dos baús de masmorras. Os discos de música cat e 13 agora são encontrados nos baús das novas mansões das florestas.The new "Relic" music disc has been added. Bedrock Edition 1.2.0 beta 1.2.0.2 New music discs have been added. All discs, except for disc 11, can be dropped by dead skeletons using skulls. Disc 11 can now be dropped by creepers. 1.4.0 beta 1.2.14.2 Mellohi and wait can be found inside treasure chests. 1.10.0 beta 1.10.0.3 The texture of Music Disc 11 has been changed. Music discs are now also dropped by dead skeletons-errants. 1.16 beta 1.16.0.57 A new Music Disc called "Pigstep" has been added. 1.16.100 beta 1.16.100.56 The IDs of music discs have been changed from record_ to music_disc_. 1.18.0 beta 1.18.0.22 A new Music Disc called "otherside" has been added. The Music Disc "otherside" cannot be dropped by creepers, and is rarely found in treasure chests of Strongholds or occasionally in Mobs' item drops. 1.19.0 beta 1.19.0.28 A new Music Disc called "5" has been added. 1.19.10 beta 1.19.10.22 Music discs are now essential for duplicating Allays. 1.20.0 beta 1.20.0.22 The Legacy Console Edition TU1 CU1 1.0 Patch 1 1.0.1 New music discs 13 and cat have been added. TU5 The remaining 10 music discs have also been added. TU12 Where Are We Now uses the blue texture used in Java version, instead of the green one used by cat, which was previously used.Minecraft Music Discs: A Collection of Sounds to Delight From various online sources
