Given article text here Looking for Strategies Against Opponents in League of Legends looking for tips on how to improve my gameplay with Ahri, can get Challenger skin from mystery box I'm maining Ahri and having trouble dealing damage to opponents who built RoA in early-mid game is double Morellonomicon still good or what are other options to get 40% CDR Flash and Teleport are recommended Summoner Spells for this build, which takes advantage of runes such as Electrocute as the keystone, Taste of Blood, Grisly Mementos, and Ultimate Hunter in the primary tree, and Manaflow Band with Transcendence in the secondary tree. The shards used are Attack Speed in offense, Adaptive Force in flex, and Health Scaling in defense. The items to build are Malignance first, followed by Sorcerer's Shoes and Horizon Focus as the next two items, with Rabadon's Deathcap, Zhonya's Hourglass, and Void Staff completing the build. The skill order is Q - W - E. In the current patch, this build has a 50.6% win rate over 3377 matches. Alternative builds can be used by swapping Summoner Spells to Flash and Teleport, with runes like Summon Aery as the keystone, Manaflow Band, Transcendence, and Scorch in the primary tree, and Biscuit Delivery with Cosmic Insight in the secondary tree. The items include Rod of Ages, Ionian Boots of Lucidity, and Liandry's Torment. This build has a 54.1% win rate across 1690 matches. For an Off-Meta Ahri Mid build, try Flash and Teleport as Summoner Spells, Grasp of the Undying, Demolish, Bone Plating, and Overgrowth in the primary rune tree, with Manaflow Band and Transcendence in the secondary tree. The items include Rod of Ages, Ionian Boots of Lucidity, and Liandry's Torment. This build has a 54.1% win rate over 462 matches. Situational items and runes can be used depending on the game context, matchup, and enemy champions. Carefully examine the team and matchup to plan the Ahri build accordingly. Avoid playing Ahri in these unfavorable Mid matchups: These champions are considered strongest counters for Ahri in current patch
