**Audi night vision assistant. How to turn on audi night vision. Audi a8 night vision camera. Night vision audi a8. Audi night vision calibration.**

**\*\*User Manual for Aodi S820 Mini Car Keys Night Vision Camera (Russian Translation)\*\***  
**\*\*Introduction\*\*** This manual was created using a translator and manual editing to provide a comprehensive guide for operating the Aodi S820 Mini Car Keys Night Vision Camera. **\*\*Main Functions\*\*** The camera has several main functions, which are described below: 1. **\*\*Power Button\*\***: Press the power button to turn on or off the device. When the device is turned on, the red and blue lights will flash, and then the red light will remain steady. The device will enter default mode (camera/video recording mode). 2. **\*\*Camera Mode\*\***: Insert a card when the device is turned off. Turn on the device and wait for system initialization. Press the camera/record button (#10) to take a photo. 3. **\*\*Video Recording Mode\*\***: Turn on the device and press the camera/record button (#10) for 2 seconds to start video recording. The red light will flash twice and then go out. To stop recording, press the power button (#9). 4. **\*\*Motion Detection Mode\*\***: Turn on the device and long-press the detection button (#11). The device will enter motion detection mode. When an object is detected, the blue light will flash, and recording will start. 5. **\*\*Night Vision Mode\*\***: Press the detection button (#11) to switch to night vision mode. To exit this mode, press the detection button again. 6. **\*\*Mobile Disk\*\***: Connect the device to a computer using a USB cable. The computer will recognize the device as a disk. You can read, transfer, copy, or delete files from the disk. 7. **\*\*Web Camera\*\***: Install the camera drive program (STR02N 2.4.exe) and connect the device to a computer. Double-click "My Computer" and click "Turn on Web Camera" to activate the web camera function. 8. **\*\*Charging\*\***: Simply connect the device to a charger to charge it. **\*\*Note\*\***: Be sure to save files every 15 minutes, as the device will overwrite the last video recording if not saved. **\*\*Charging and Battery Care\*\***: \* To charge your camera, simply plug in the USB cable to a computer or charger. \* When charging, the red light will flash until the battery is fully charged, then it will turn off. \* Note: This device has a high-capacity lithium-ion polymer battery that can be charged at any time. However, for optimal performance, we recommend completely draining the battery before recharging it 5 times to achieve maximum capacity. \* Additionally, we suggest continuing to charge the battery for 30-60 minutes once the red light indicates that charging is complete. **\*\*Setting Time and Date\*\***: \* The camera has a built-in clock that displays time during recording or playback. You may need to set the date and time parameter. \* To do this, connect your device to a computer, find the drive on your PC, right-click on it, select "create," then choose "document/file." Name the document/file as "time" (in lowercase) with a ".txt" extension. Set the format of the date and time as: "Year/Month/Date Hour:Minute:Second." **\*\*Camera Operation\*\***: \* When the camera's memory is full, red and blue lights will flash simultaneously for 3 seconds to save an automatic image/video and shut down. \* If you want to continue using the camera, please back up your video files on a computer, then delete them from the device to free up space. Aodi S820 Night Vision Camera Instruction Manual suggests reading safety warnings before use. This camera features motion detection and night vision, ideal for discreet filming. The reviewer will examine various tech products, including accessories and motherboards, with a focus on gadgets and disassembly. They invite feedback and request reviews via social media channels and email.
