The Event of the Year: 2026 Red Cape Gala!

Mark your calendar for a truly meaningful evening!

We're thrilled to invite you to the **Super Jake Foundation's Red Cape Gala** on **Saturday, February 14, 2026**, from **6 p.m. - midnight** at the **Marriott Lincolnshire**.

This annual event is more than a celebration – it's a chance to be a real-life hero for children battling neuroblastoma. With your support, we fund critical research, provide direct financial assistance to families in crisis and help keep hope alive.

How you can make a difference:

- [Become a Sponsor](#) to amplify your impact and showcase your brand's commitment to saving lives.
- [Purchase your tickets](#) now and reserve your seat at this inspiring evening.
- [Donate](#) in advance to help us reach more families and fund life-saving treatment.

Look how fun last year's gala was! Don't miss out on another unforgettable night for a cause that matters.

Want to Get Involved? Volunteer at the Red Cape Gala!

We're looking for passionate, dedicated volunteers to help make the 2026 Red Cape Gala a success! If you'd like to lend a hand, please email superjakefoundation@gmail.com. Committee meetings will be starting soon, so reach out now to stay in the loop and be part of something truly meaningful.

🧑 September is Childhood Cancer Awareness Month 🧑

Every day, thousands of families face the unimaginable reality of a childhood cancer diagnosis. At the Super Jake Foundation, we're committed to funding life-saving research and providing support to families fighting neuroblastoma.

Next month, join us in honoring the brave children and families impacted by childhood cancer.

Make a donation today and help us bring hope, strength and healing to those who need it most. Together, we can make a difference. 🧡

Neuroblastoma at a Glance: Facts, Hope & Progress

- According to the American Cancer Society, there are approximately 600 to 800 new cases of neuroblastoma each year in the United States. It is the most common cancer in infants under 1 year old.
- Thanks to research and support from families and foundations like Super Jake, survival rates have significantly improved over the past two decades — with low- and intermediate-risk patients now having a 5-year survival rate of over 90%.
- In the past 10 years, new immunotherapy treatments have brought hope to children with high-risk neuroblastoma — helping the body's immune system fight the cancer more effectively.
- Every year, thousands of children who have beaten neuroblastoma go on to live full lives — attending school, playing sports, and celebrating cancer-free milestones with their families.

**Fighting with Courage: Meet Our Newest Superhero
in the Battle Against Neuroblastoma**

☀️ Meet Leona ☀️

Meet Leona, a playful, fearless 2-year-old whose smile has always lit up the room. After years of loss, she was the miracle baby her family had been waiting for.

But in September 2024, everything changed. What started as a stomach bug turned out to be Neuroblastoma. Leona is now facing treatment with the same courage her name represents: lioness.

Her dad, self-employed, has had to keep working to keep the family afloat. They need help with monthly housing costs so they can stay together through bone marrow transplants and long hospital days.

If you can, please donate through the link below to help Leona's family stay close during this fight. Every bit of support counts.
