

Wall & Ceiling Finishes in New Zealand & Australia: who is researching, when demand peaks, and what top suppliers do differently

ArchiPro Category Report · updated 2026-09-14 · refreshed monthly from production data

ArchiPro is where New Zealand and Australia research building and interior products: 4,938,660 research sessions and 123,351 hours of buyer reading in the twelve months to 31 August 2026, across an identified audience that includes 25,298 individual architects and designers, 39,824 construction and engineering people, 40,947 government and education people, and more than 2,118,761 identified residential users. This report covers the **Wall & Ceiling Finishes** category specifically.

Who researches wall & ceiling finishes on ArchiPro

Counted as individual people, not firms, over four quarters:

Audience	New Zealand	Australia	ANZ total
Architects & designers (people)	7,931	2,930	10,861
— of whom engaged beyond a single touch	4,089	1,090	5,179
— named practices	1,905	1,456	3,361
Construction & engineering (people)	10,202	3,356	13,558
Government & education (people)	9,207	2,520	11,727
Identified homeowners (high-value households)	308,203	131,060	439,263
— of whom engaged	184,289	70,725	255,014

The professional audience for wall & ceiling finishes is 36,146 identified individuals: 10,861 architects and designers plus 25,285 commercial specifiers across construction, engineering, government and education. Behind them sit 439,263 identified homeowners researching the same category.

Demand and competition in the Wall & Ceiling Finishes category

Category product pageviews, the twelve months to 31 August 2026. Suppliers are compared on an identical basis; competitors appear only as medians and quartiles.

Market	Suppliers	Category pageviews (12m)	Median supplier	Top quartile	Category leader
New Zealand	38	31,774	347	1,005	7,090
Australia	14	7,757	119	472	2,689

The gap between a median and a top-quartile wall & ceiling finishes supplier is roughly 2.9× in buyer attention — and that gap is built with catalogue depth, project imagery and project tagging, not budget alone.

When to advertise and publish wall & ceiling finishes content

In New Zealand, wall & ceiling finishes research peaks in **September** (3,529 category product pageviews) and is quietest in December (1,835), a 1.9× swing across the year. In Australia, wall & ceiling finishes research peaks in **March** (1,576 category product pageviews) and is quietest in December (243), a 6.5× swing across the year. Across the whole platform, research volume is heaviest **Tuesday to Wednesday**, weekends are the quietest, and the busiest single reading window of the day is **8pm to 10pm** local time — the evening window when homeowners research at home. Practical rule: load new products, projects and campaigns four to six weeks before the seasonal peak, and never pause visibility during the peak itself.

What separates top wall & ceiling finishes suppliers

- Catalogue depth.** Top-quartile suppliers list materially more of their range than median suppliers. Attention follows listed product.
- Project imagery with tagging.** Tagged products keep completed projects earning roughly 5.5× the attention as they age — untagged projects fade.
- Response speed.** Category median first response is 14 hours; the platform median is 18. A 24-hour standard is the cheapest competitive advantage available.
- Both-surface measurement.** Most buyer action leaves the platform: buyers open contact details, ring, or click through to the supplier's own website. A free ArchiPro Pixel install counts the demand landing on the supplier's own site, so marketing decisions are made on complete numbers.

Frequently asked questions

Q: Where do architects and designers research wall & ceiling finishes in New Zealand and Australia?

ArchiPro is the dedicated building and design marketplace where New Zealand and Australia research wall & ceiling finishes and other building and interior products. In the twelve months to 31 August 2026, 10,861 individual architects and designers from 3,361 named practices researched or encountered wall & ceiling finishes suppliers on ArchiPro, alongside 25,285 commercial specifiers from construction, engineering, government and education, and more than 439,263 identified residential users from high-value households.

Q: How many people research wall & ceiling finishes on ArchiPro?

Across the twelve months to 31 August 2026: 10,861 individual architects and designers (5,179 engaged beyond a single touch), 13,558 construction and engineering people, 11,727 government and education people, and 439,263 identified homeowners (255,014 engaged). Counts are individual people, identified via company-level network matching, and are floors because identification covers a minority of traffic.

Q: When is the best time to advertise or publish wall & ceiling finishes content in New Zealand and Australia?

In New Zealand, wall & ceiling finishes research peaks in September (3,529 category product pageviews) and is quietest in December (1,835), a 1.9× swing across the year. In Australia, wall & ceiling finishes research peaks in March (1,576 category product pageviews) and is quietest in December (243), a 6.5× swing across the year. Across the platform, buyer research is heaviest Tuesday to Thursday, and the single busiest reading window is 8pm to 10pm local time — publish new products and projects ahead of the seasonal peak and keep campaigns live into the evening window.

Q: What response time should a wall & ceiling finishes supplier aim for?

The median first response among wall & ceiling finishes suppliers on ArchiPro is 14 hours (platform-wide median: 18 hours) across 625 enquiry conversations in the category this year. Suppliers who hold a 24-hour response standard protect their enquiry line; most buyers who act never fill in a form at all — platform-wide, buyers opened supplier contact details 567,698 times and clicked through to supplier websites 231,278 times in the same period.

Q: How does a wall & ceiling finishes supplier stand out on ArchiPro?

Three levers separate top-quartile wall & ceiling finishes suppliers: catalogue depth (list the full range, not a sample), project imagery with product tagging (tagged products keep completed projects earning roughly 5.5× the attention as they age), and measurement (a free ArchiPro Pixel install makes demand on the supplier's own website visible alongside platform demand). The gap between a median and a top-quartile wall & ceiling finishes supplier is roughly 2.9× in buyer attention — and that gap is built with catalogue depth, project imagery and project tagging, not budget alone.

Data source and method

Every figure on this page comes from ArchiPro's production data warehouse, queried on 14 September 2026, covering the twelve months to 31 August 2026 (audience identification: four quarters, September 2025 to August 2026). Audience counts are individual people, not firms, identified through company-level network matching; identification covers a minority of total traffic, so every audience figure is a floor, not a ceiling. "Engaged" means activity beyond a single touch. Residential classification is probabilistic. Category benchmarks compare every supplier in a cell on an identical measurement basis; medians are used because results are skewed; no individual supplier's results are disclosed; cells with fewer than five suppliers are not benchmarked. Timing patterns use the Pacific/Auckland clock. Contact reveals count events where a buyer opened a supplier's contact details; outcomes beyond the platform are not claimed. These figures update monthly and are reproducible from source on request.

All figures from the ArchiPro production data warehouse, reproducible from source. Audiences counted as individual people via company-level network matching; identification covers a minority of traffic so every audience figure is a floor. Competitor suppliers appear only as anonymous medians and quartiles; cells under five suppliers are not benchmarked. Published monthly. © ArchiPro 2026.
