Dear Takashi,

because of your Omakase order, I have produced the first Instrument with a sound optimized 3d printed part!

The 3D printing material is normally not ideal for the B-String vibration, because it absorbs too much of the low frequencies.

I finally found a way of adjusting the material by hollowing it out with many small tubes in 90° angle to the string force. So it loses material but keeps a strong structure. The sound result for the B-string you will hear!

If you ever need to prove that it is your bass, I have printed your name below the Bridge Pickup. ;-)

I personally love very much the “Jazz-Bass” setup the instrument. If you pull out the coil splitter of the bridge pickup (on the treble double pot) and add a little bit treble and bass.

I’m more and more a fan of Japan and Japanese culture. The connection to your country is always full of positive vibes – positive energy. I have named the theme of the bass after this feeling.

The color RED I choose because in my imagination positive energy has this color. The inlays are made of 24k pure Gold to symbolize pureness and truth of positive energy.

It was a great challenge and also great fun to create this unique piece! I wish you a lot of fun playing it and hope you receive POSITIVE ENERGY by creating music with it!

Jens Ritter

Instruments

Certificate of Authenticity

Instrument Identification Number:

1727

Shape	R8-Concept
Number of Strings	5
String Spacing	Standard 5 (70mm-40mm)
Hardwarecolor	Gold
Bridge / String Attachment	RITTER BA Tuning System
Tuners	RITTER BA Tuning System
Nut	Bone
Strap Buttons	Dunlop Straploks
