About the instrument

I was about to BBQ with my 2 boys Linus & Robin. They asked me what wood they could use for fire.

As a joke I told them to use the best tone wood I have. From this joke we developed a silly story about using tone wood for starting a fire and building an instrument out of the rest. Than finishing the instrument with beer and so on.

We liked the idea of doing something crazy and started to think how we could make a real instrument finish out of some unusual components.

So we prepared our "stick-BBQ" and started the fire with fines Flamed maple. The wood we used for getting the coal dust was finest Quilted Maple.

The Jim Beam bottle was a present by my cousin a few years ago. I didn't drink much...

It was really fun to mix this 2 components together and do the experiment.

Definitely it was the best smelling wood stain I have ever used!
