

Screened Loam

Overview

Screened Loam is clean, consistent topsoil screened for optimal texture and easy spreading. It's the go-to choice for filling holes, leveling sites, or laying down a fresh base before new sod. Perfect for large projects that need reliable volume and quality.

Ideal Applications

Sports Fields

Residential Yards

School Fields and Parks

Golf Courses

Commercial Landscapes

Top Soil and Dressing

Mixture Composition

- Sandy Loam

Benefits

- Clean, screened topsoil with minimal debris
- Easy to spread and grade for landscaping projects
- Supports healthy sod establishment
- Consistent quality for smooth installs
