

Riser Hydrant

The '**Riser**' Hydrant are a popular addition to the Williams product range. At Williams, we don't overcomplicate things. Our Riser Hydrants are designed with one purpose in mind -to make on-farm effluent systems simple and more reliable. While riser hydrant designs are not new to the market, our experienced installation team has worked with many different brands over the years- giving us firsthand insight into what works and what doesn't. We took the best features from across the industry, added our own improvements, and built a hydrant that's stronger, smarter, and better suited to on-farm use.

- Fully hot dipped galvanised
- Built of of 76mm x 2mm mild steel tubing

- Simple to install- just one tool required!
- Reliable pressure sealing system
- Multiple connection options available to suit your requirements
- **NZ designed and manufactured**
- **Simple, built to last**
- **12 month manufacturer guarantee**

Williams

Effluent Solutions

"We put the Williams Risers in six years ago and they've been a game changer. They're simple, tough, and just work every day without the headaches we used to have. It's the sort of gear that makes farm life easier."
