GB MAGNUM

The Williams GB Magnum Travelling Raingun Irrigator – A Game Changer in Effluent Irrigation. The Magnum is the first of its kind, featuring a patented design that blends the high performance of a static raingun with the proven reliability of our Greenback travelling irrigator. This innovative combination delivers superior coverage, efficiency, and dependability—outperforming all other effluent irrigation systems on the market. With a wetted width more than twice that of traditional travelling irrigators and application rates and depths that rival sprinkler systems, the Magnum is the clear solution to your MooPoo management needs. Every Magnum comes standard with our durable 5mm Spider Web synthetic rope, available in 250m, 300m, and 400m lengths, ensuring flexibility to suit your operation. **Upgrade to the Magnum today and experience a smarter way to irrigate.**

- ✓ Boom length 5.8 meters
- ✓ 3mm minimum application depth
- ✓ Under 10mm per hour application rates
- ✓ Sime Synkro effluent rain gun with 14–22mm nozzle range
- ✓ 5 travel speeds
- ✓ Wire layer fitted for up to 400m of cable
- ✓ Drags up to 75 OD PE pipe
- ✓ Stainless steel and galvanised cables available on request
- ✓ 13mm rubber power nozzles with quick release fittings
- ✓ **NZ designed and manufactured**
- ✓ **Simple, built to last**
- ✓ **12 month manufacturer guarantee**

Williams

Effluent Solutions

“The lower application depths offered by the Williams GB Magnum, has enabled us to significantly increase the number of irrigation days possible throughout the year by reducing the trigger soil moisture deficit required for an irrigation event. The single factor reduced our required storage capacity by 1,100m³ saving us approximately \$42,000 in pond construction costs.”

W. Reynolds, Gordonton
