All-in-one A.I. Orchestration

More than just a chatbot.

HYPER PRODUCTIVITY

We get your team doing the work that matters

LOWER COST PER POLICY

Time to underwrite goes from minutes to seconds with higher accuracy

ELIMINATE FRAUD

Catch fraud that you didn't even know was happening

20x Productivity Boost +7% Loss Ratio Improvement

Quantum Alliance, an MGA, automated 90% of its underwriting workflow in a few months, resulting in reduced premium leakage and improved loss ratios.

100% Claims Automation

BCMG, a commercial brokerage, has automated its commercial auto FNOL, its email triage department, and employee benefit claims. This has cut expenses, enabling the company to focus on acquiring new business.

DAY ONE

Human Error?
Manual Workarounds?
Fraud?

Identify the Issues

We focus on addressing your core issues: Is it premium leakage? Claims fraud? Or perhaps managing requests from call center agents? We tackle only the essential problems, without any unnecessary AI fluff.

15 MINUTES

Loss Run Parsing
Tampered Invoice
PoP Validation

Task Solutions

Our collection of **ready-to-use solutions** can be activated with just a click. Simply sign up and **start using it for free**. When you're ready, integrate the API as part of a larger workflow.

ONE WEEK

Chatbots
Submissions
Email Triage

Modules

Modules represent a compilation of our Blocks, designed to address **larger core problems**. Consider them as comprehensive tools, ranging from full document automation to end-to-end chatbots for First Notice of Loss (FNOL) and service needs.

2 MONTHS

STP Underwriting
FNOL Automated
Pricing

Enterprise Data Platform

Our enterprise data platform integrates all our modules, supported by a comprehensive data warehouse. Now, you can enjoy **complete automation for underwriting, servicing, and FNOL**.

How we are different

Safe & Cost-Effective

We are the first to say, "This doesn't need to be A.I".
We blend AI into our data platform selectively - using it only where necessary. Keeping costs low, and accuracy high.

Explainable & Auditable

Our platform is built with regulation and audit in mind. Our AI workflow engine sends all inputs and insights into our data warehouse, allowing you to have full traceability of what the system is doing and why.
