# What is Web3D?

The first automated platform specialized in the real estate sector to generate a 24/7 virtual showroom on an interactive, highly visual, and realistic website for the presentation and marketing of a real estate project.

We integrate all visual content and information to help understand, explore, and fully experience a real estate project.

The goal is to create the best experience for people who wish to purchase a property in a specific project, no matter where they are.

# How does it work?

## 01 IT'S SOLD BY LISCENSE

Based on the number of units in the project

## 02 CONTENT NEEDS TO BE CREATED

Images, videos and 360° tours based on the content gui

## 03 WEB3D PLATAFORM

Cloud-based software with infrastructure, setup, content upload, and publishing.

# Commercial benefits for Resellers

- Comprehensive information
- Easy access and understanding of all project information

# Advantages for your Clients

# What it generates in clients

It generates highly qualified leads

A high level of trust with potential clients

It allows choosing and deciding on a real estate investment in less time.

A 3D architectural rendering of a city skyline. In the foreground, there are several tall, modern skyscrapers with glass facades and blue-tinted windows. The buildings are surrounded by a dense forest of palm trees. In the background, a sprawling cityscape is visible, with numerous smaller buildings and houses. The sky is a deep blue with some light clouds. The overall scene is a digital representation of a modern urban environment.

We will see **projects** that have already implemented and are using **Web3D**, adapting to the **current and future Digital Era**.

- Provide an interactive and guided experience
- Highly visual and realistic, integrating images, videos, and 360° tours
- Support for multiple types of projects
- Specialized and focused on Real Estate
- Easy and agile, adapted to the current and future digital era
