

Workhelix's Nucleus SaaS platform tracks AI progress and identifies high-impact opportunities clearly, continuously, and rigorously.

The organizations winning with AI know where it's working, where it can do more, and how to give key stakeholders the information they need. Workhelix delivers these capabilities by combining cutting-edge research and customer obsession.

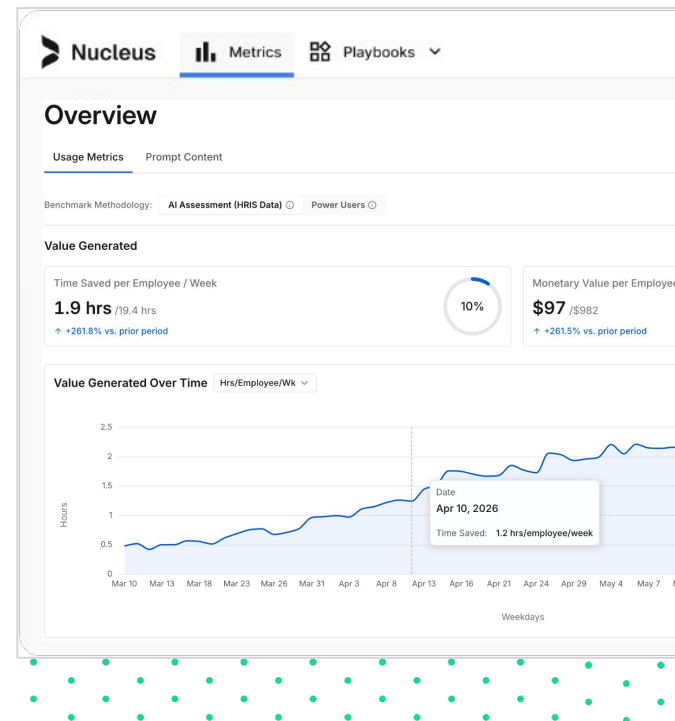

"Workhelix has helped Nasdaq evaluate and quantify AI's impact across the company, leveraging deep, role-level analytics to identify impact, capture value, and unlock new growth opportunities."

— Michael O'Rourke, SVP of AI and Machine Learning Engineering

Workhelix identifies AI opportunities fast, with quick, seamless integration

With HRIS and AI usage data, Nucleus rapidly reveals the quality, quantity, and breadth of your organizations AI usage.

Know where you stand with AI

- How much time and money are you saving with AI?
- Are roles and groups improving their AI use? What are the trends?
- Who are your power users? What are they doing differently?
- Where are your biggest gaps between AI's potential and current usage?

Grow AI's footprint and impact

- Spread power users' innovations and best practices.
- Increase quality, quantity, and sophistication of AI use.
- Help slower-moving groups seize the technology's potential.
- Close the gaps between what AI can do and what it's currently doing.
