

Witley suite - lever handles

A wide range of return to door and straight lever handles manufactured from aluminium brass and stainless steel. Manufactured to superior quality standards from the finest materials available HE9 aluminium extrusion and 5005 aluminium sheet for anodised aluminium products; in AISI316 for stainless steel (where external use is required) or 304 stainless steel for internal applications.

The Witley Suite can be altered to your specification. For example, centres to accommodate oval or profile cylinders can be varied for the selected lock and levers are fully interchangeable. All our products can be bolted through the door

Lock centres –
when ordering oval or profile, please state centres required. Standard centres are 48.5mm, but any centres can be accommodated.
Face fixing plates are 10g in aluminium and 16g in stainless steel and brass.

All rose fittings (including escutcheons) can be supplied with bolt through at standard 38mm centres using 'T' fix bolts. For variations please contact a member of our technical staff.

Witley suite - levers on roses, escutcheons, turns & releases

A range of levers and knobs on either 10mm sprung roses or slimline unsprung roses. Escutcheons to suit most applications, slimline, standard or 10g face fix. All levers are spindle fixed using grub screws.

All the items listed are available in the following finishes: AS, PB, SSS, PSS
Refer to page 3 for glossary of finishes.

Dimensions all
centre/centre

Back to back handles are supplied with beefeater bolts for a secure fixing. Standard bolts are designed for 45mm - 55mm width doors. For thicker doors of 60mm and over, please advise thickness when ordering. Please also state when ordering for glass doors.

As an alternative to back to back handles, roses or plates can be bolted through for extra security using 'T' fix bolts. Please refer to our price list for standard sizes for pull handles on plates. Specials can be produced to any size and gauge.

Witley suite fittings for the less able

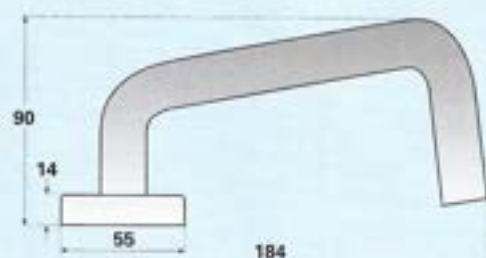

Although our range can be accurately described as user friendly, we have developed a suite of products specifically to assist the disabled, including extended bathroom turns which are easy to grip. Our specially extended lever handle is easy to operate with elbows, but safely returns to the door, to avoid catching clothing, particularly sleeves and pockets.

As with most of our range, we can produce special items to complement our standard fittings to help the less able, and our technical staff are always available to offer advice or review sketches / drawings of products to meet special needs.

All the items listed are available in the following finishes: **AS, PB, SSS, PSS**

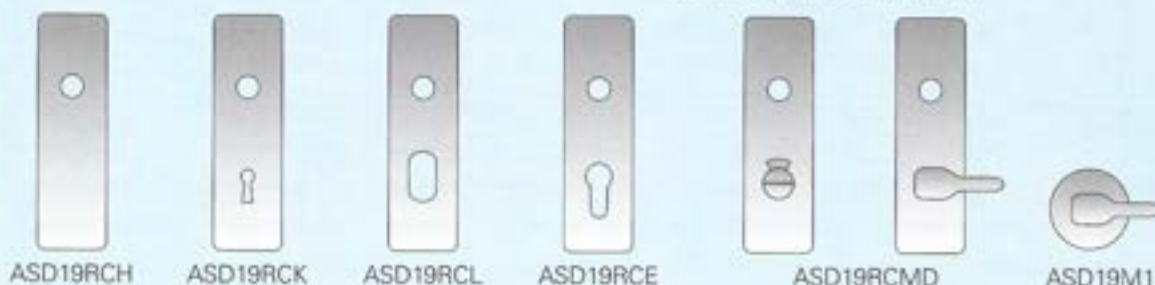

Refer to page 3 for glossary of finishes.
